

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

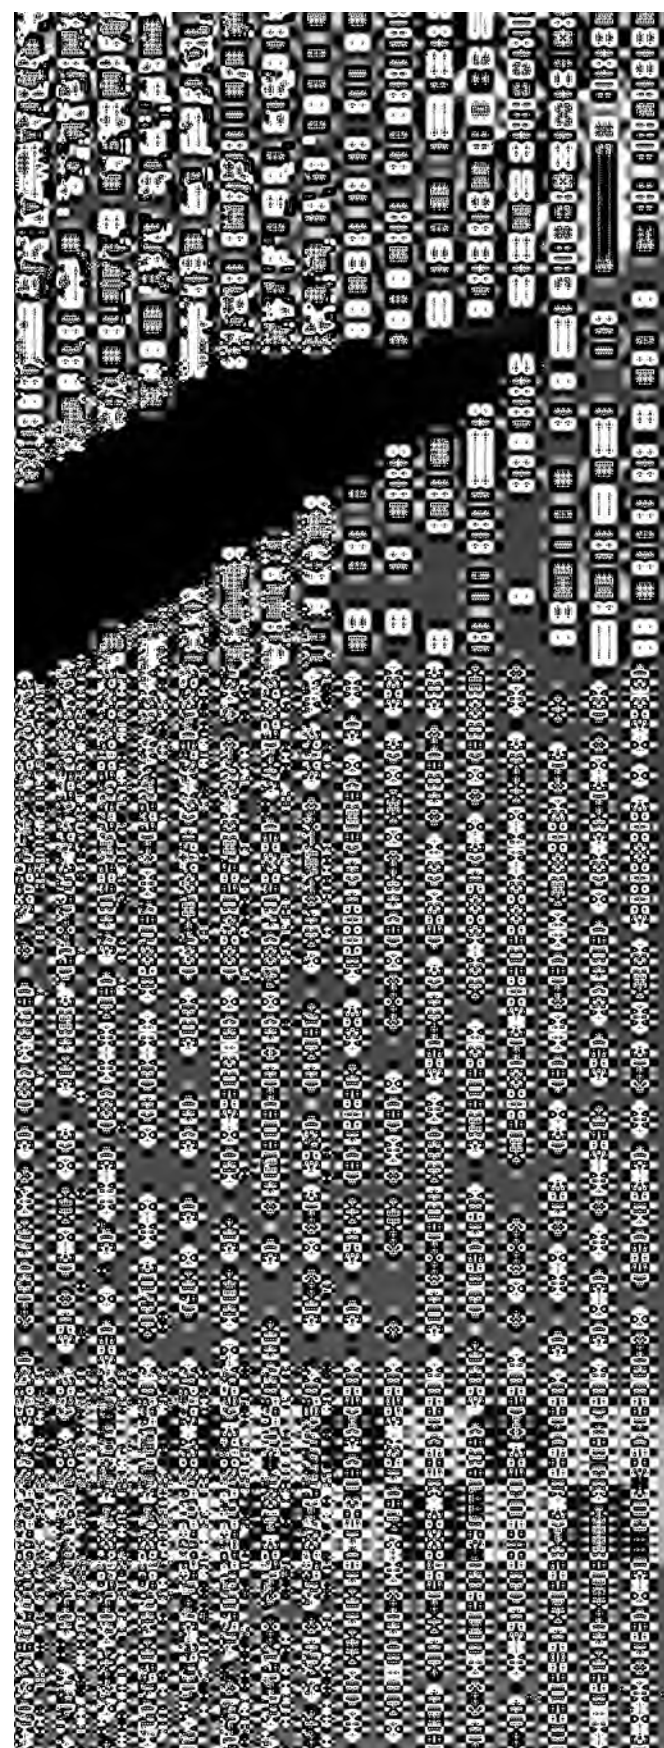

We also ask that you:

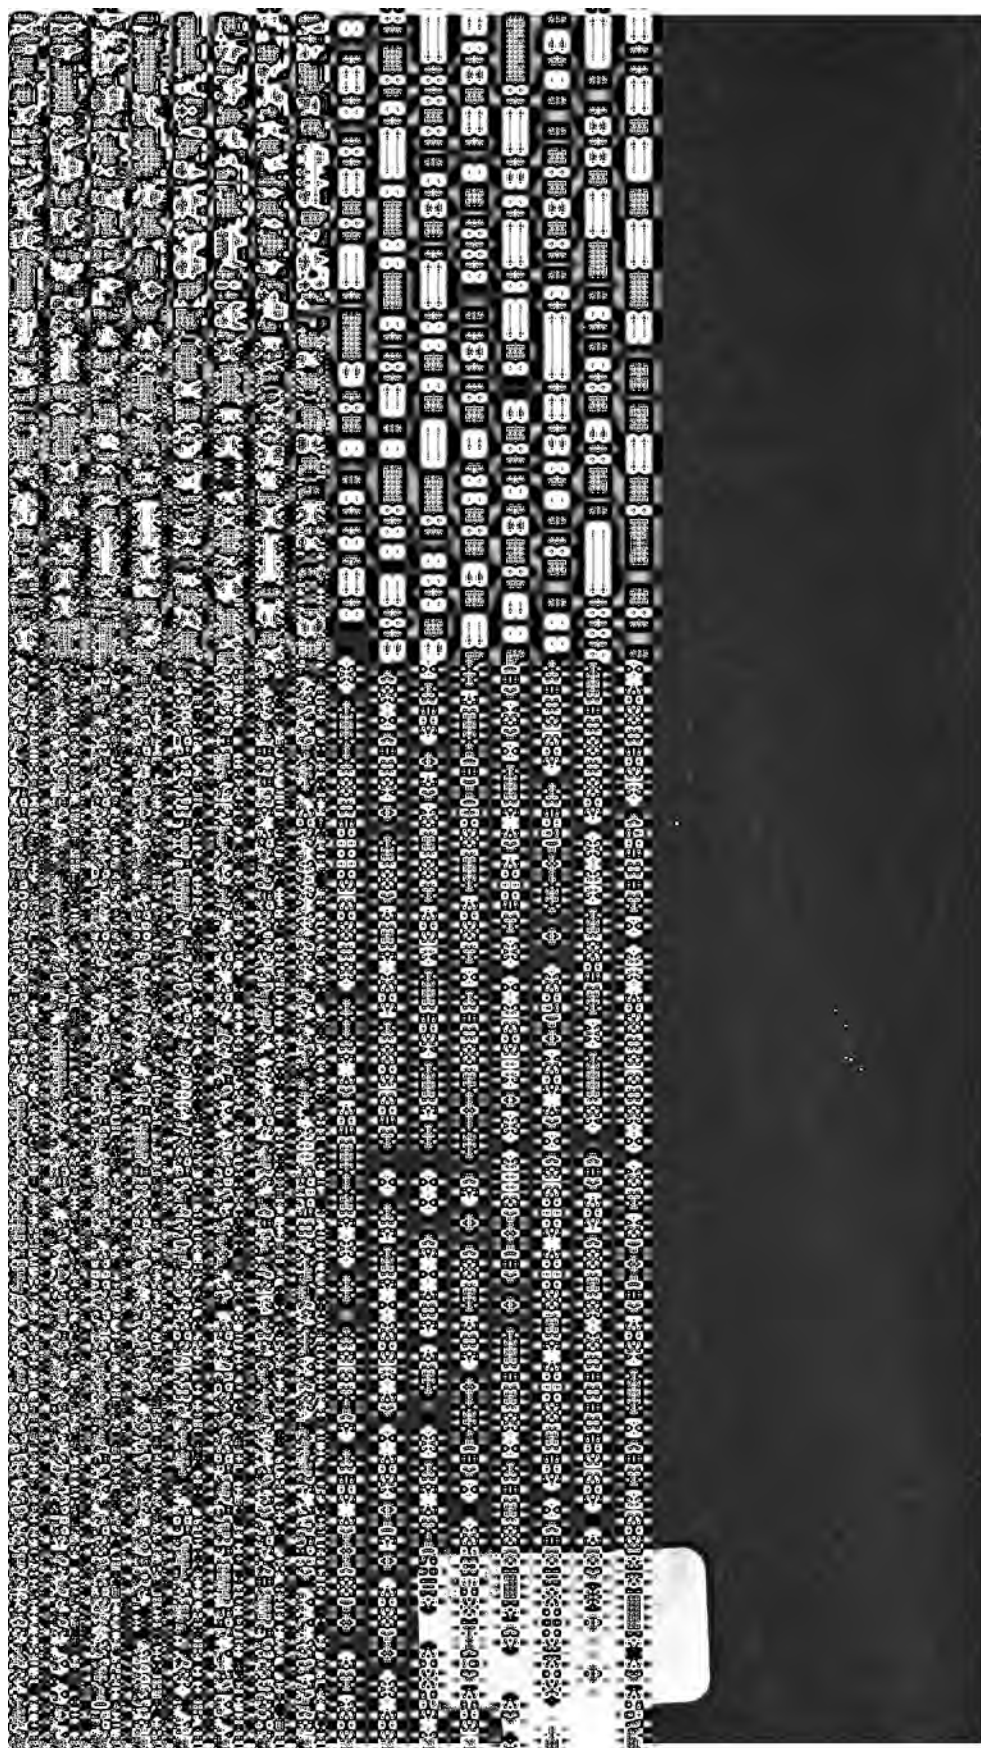

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

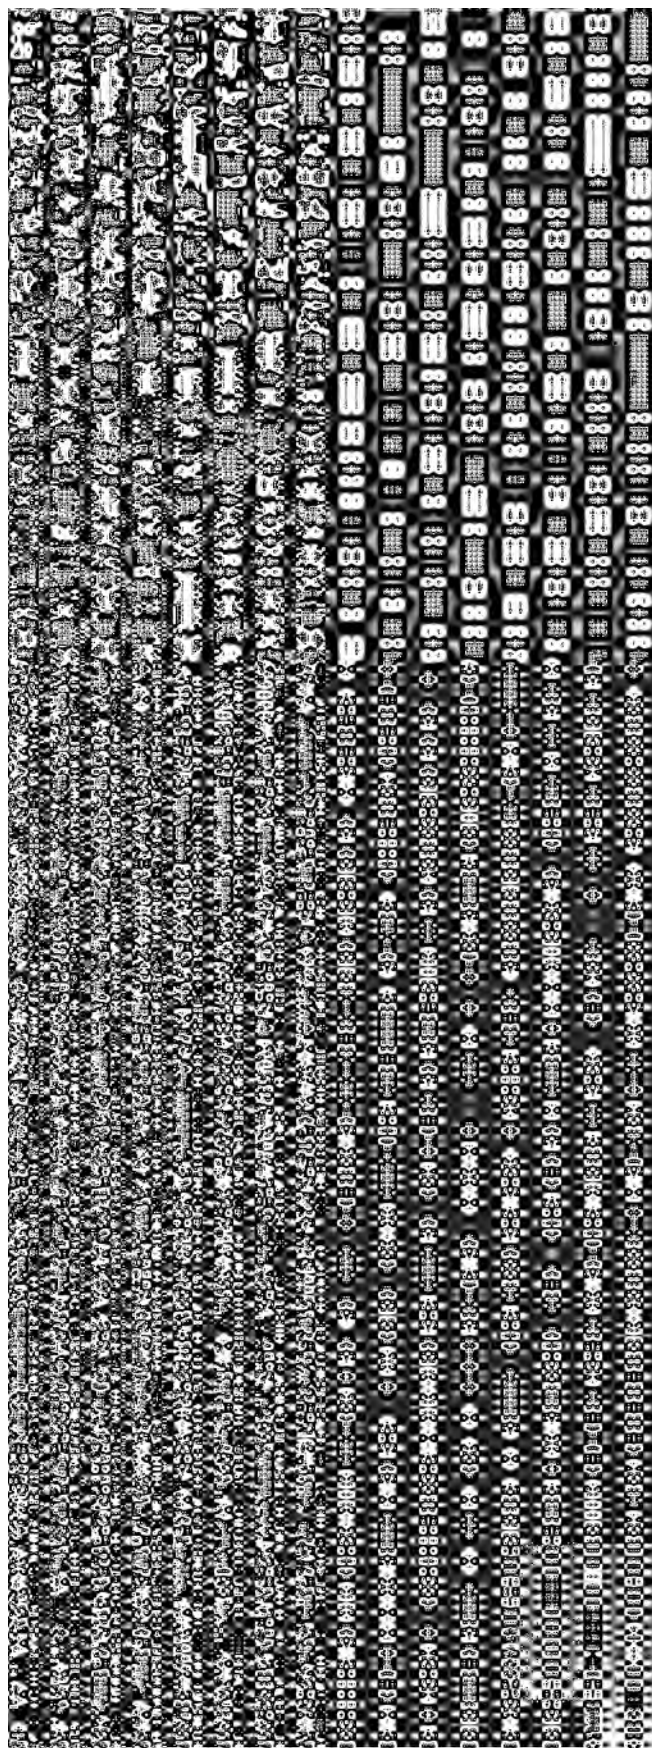

About Google Book Search

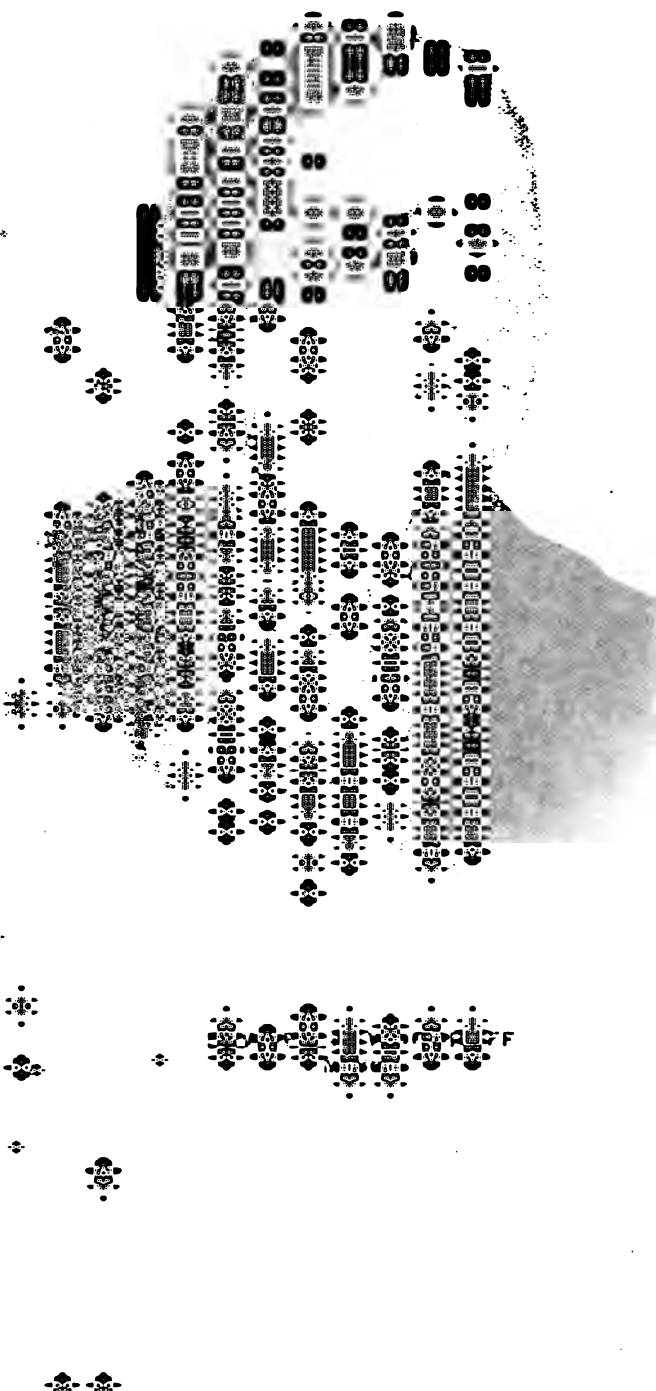

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Total Bonded Debt.....\$414,500.00

The Water Works Bonds, \$195,000.00, were assumed by the Peoria Water Co. when the City Water Works were sold to them. The City holds first mortgage on the new works for the payment of them, which would make the City's bonded debt \$219,500.00 January 1, 1905. Arrangements have been completed with the Water Works Co. to pay this money February 1, 1905.

AN ORDINANCE

LEVYING A SCHOOL TAX FOR THE CITY OF PEORIA, AND TOWNSHIP OF PEORIA, IN THE STATE OF ILLINOIS, FOR THE ENSUING YEAR, 1904-1905.

Be it Ordained by the City Council of the City of Peoria:

SECTION 1. That, whereas, the Board of School Inspectors of the City of Peoria, in the County of Peoria and State of Illinois, have caused a notice to be given to the City Council of the said City of Peoria, that in the judgment of said Board of School Inspectors, it will require to be raised by taxation on all the taxable real estate and personal property in that portion of Township nine (9) North, Range eight (8) East of the Fourth (4th) Principal Meridian, in the said County of Peoria, described as follows:

The south half of Section thirty-three (33) and the south half of the north half of Section thirty-three (33), and the southwest quarter of Section thirty-four (34), and the south half of the northwest quarter of Section thirty-four (34); also commencing at the southeast corner of said southwest quarter of said Section thirty-four (34), and running thence east on the section line to the intersection of said section line with the west line of the right of way of the Central Railway Company; thence in a northerly direction along said west line of said right of way to the half-section line; thence west along said half-section line to the center of said Section thirty-four (34); thence south to the place of beginning. And also upon all the taxable real estate and personal property in Township eight (8) North, Range eight (8) East of the Fourth (4th) Principal Meridian, in the said County of Peoria, an amount equal to a tax of two (2) per cent. for the support and maintenance of the public schools therein; and an additional amount equal to one (1) per cent.

thereon, for school building purposes; amounting to a tax of three (3) per cent. upon all the taxable real estate and personal property in the said portion of said Township nine (9) North, Range eight (8) East of the Fourth Principal Meridian above described, and also upon all the taxable real estate and personal property in said Township Eight (8) North, Range Eight (8) East of the Fourth (4th) Principal Meridian, for school purposes, for the ensuing year.

Therefore, there is hereby levied a tax of three (3) per cent. of the assessed valuation of the real estate and personal property in the aforesaid portion of Township Nine (9) North, Range Eight (8) East of the Fourth (4th) Principal Meridian, above described, and upon all of said Township Eight (8), North Range Eight (8) East of the Fourth (4th) Principal Meridian, upon and against all the taxable real estate and personal property in the aforesaid portion of Township Nine (9) North, Range Eight (8) East of the Fourth (4th) Principal Meridian, in the County of Peoria, and State of Illinois, described as follows:

The south half of Section thirty-three (33) and the south half of the north half of Section thirty-three (33) and the southwest quarter of Section thirty-four (34) and the south half of the northwest quarter of Section thirty-four (34); also, commencing at the southeast corner of said southwest quarter of Section thirty-four (34) and running thence east on the section line to the intersection of said section line with the west line of the right of way of the Central Railway Company; thence in a northerly direction along the said west line of said right of way of said Central Railway Company to its intersection with the half section line; thence west along the said half section line to the center of said Section Thirty-four (34); thence south to the place of beginning.

And upon and against all the taxable real estate and personal property in Township Eight (8), North Range Eight (8) East of the Fourth (4th) Principal Meridian, in the County of Peoria, in the State of Illinois, which said tax is hereby ordered extended and entered against all the taxable real estate and personal property in said portion of said Township Nine (9) North, Range Eight (8) East of the Fourth (4th) Principal Meridian above described, and all said Township Eight (8), North Range Eight (8) East of the Fourth (4th) Principal Meridian by the County Clerk of the said County of Peoria, in the State of Illinois, for said school purposes, and the same to be extended and collected as provided by law.

SECTION 2. The City Clerk of said City of Peoria is hereby instructed and directed to deliver a duly certified copy of this ordinance to the County Clerk of the said County of Peoria, in the State of Illinois, at his office in the Court House, in the City of Peoria, as the authority to the said County Clerk for the extending of said tax upon all the taxable real and personal estate and property in said portion of said Township nine (9) North, Range eight (8) East of the Fourth (4th) Principal

Meridian above described, and in all of said Township eight (8) North, Range eight (8) East of the Fourth (4th) Principal Meridian above described, as the law directs.

Passed in Council this 26th day of July, A. D. 1904.

E. N. WOODRUFF, Mayor.

ROBERT JOOS, City Clerk.

Attest:

Certified copy of above ordinance filed with the County Clerk the third day of August, A. D. 1904.

FIRE MARSHAL'S REPORT

FOR THE YEAR 1904.

*To the Honorable Mayor and Board of Aldermen
of the City of Peoria.*

GENTLEMEN:—I have the honor to submit herewith to your honorable body the annual report of the Fire Department for the year ending December 31, 1904, being my second annual report and the twenty-ninth of the paid fire department of the City of Peoria.

HOSE IN SERVICE.

We have at the present time the following amount of hose in service:

- 20,200 feet of 2½-inch Cotton Hose.
 - 12,000 feet of this hose in good condition.
 - 7,000 feet in fair condition.
 - 1,200 feet worn out.
- 2,300 feet of 1-inch chemical hose.
 - 1,300 feet of this hose in good condition.
 - 900 feet in fair condition.
 - 150 feet worn out.
- 1 50-foot section 3-inch rubber hose in good condition.
- 3 25-foot sections 3½-inch rubber hose in good condition.
- 1 22-foot section of 3½-inch cotton hose in good condition.
- 1 16-foot section 4-inch cotton hose in good condition.

During the year we furnishrd the sewer department with 2,050 feet of 2½-inch hose for flushing sewers and 150 feet to the House of Correction. Sold old hose to the amount of \$15.00 and turned money over to Comptroller.

NEW HOSE.

The department will need 3,000 feet 2½-inch hose and 1,000 feet 1-inch chemical hose.

APPARATUS.

There are in service at the present time eight two-horse hose wagons; two combination chemical and hose wagons with fifty gallon chemical tank; one double eighty-gallon champion chemical engine; two city service trucks. These trucks are both new; one, No. 1, replaces the old truck that was in service at Holly engine house; the other, No. 3, has been added to the department with a crew of four men, and put in service at No. 4 engine house, 1523 South Adams street. Both these trucks are modern and up-to-date in every way and a very valuable addition to the department. One three-horse eighty-five foot extension aerial truck; one second size Ahren's engine; twelve portable hand chemicals.

Volunteer Companies Nos. 1 and 2, South Peoria, two Howe combination chemicals and hand engine.

Volunteer Company No. 4, one hand hose cart and one four-wheeled hose carriage.

Fire Marshal and Assistant have each been furnished with new buggies during the past year.

IN RESERVE.

One first-class Button engine; one second-class Clapp & Jones engine; one city service truck; two hose carriages; one chief's buggy.

ENGINE HOUSES.

There are ten engine houses occupied by the Fire Department. They are all in good repair, having been repaired and painted during the past year. All they will need during the coming year will be ordinary repairs.

HORSES.

There are thirty-six horses owned by the department; of this number thirty-four are in regular service; two are used as extras. Some of these horses are old and crippled and ought to be disposed of and replaced by young horses. During the year two died; two were traded off for young horses; four were purchased.

FIRE HYDRANTS.

The hydrants have been inspected by the Fire Department and Water Company. They were found in good condition. Total number inspected and counted 1,143.

OVERHEAD WIRES.

In my last report I called your attention to the serious obstruction the department had to contend with in the network of overhead wires in the business center of the city. It is almost impossible to raise ladders to reach the buildings even in daylight much less at night. Something should be done as soon as possible to remedy this evil.

RECOMMENDATIONS.

Would recommend that new truck be purchased to replace the No. 2. This truck is old, worn out and out of date and ought to be replaced with a new one. Steamer No. 2 needs repairing. Combination No. 1 and Hose Wagon No. 6 need painting. The balance of the apparatus is in good condition. The department will need 3,000 feet of 2½ inch hose and 1,000 feet chemical hose.

FIRE ALARMS.

There are 168 fire alarm stations; ten engine house gongs; four officers's gongs; fifteen dropper boxes; three public bell strikers; eleven switches for controlling night lights.

VALUE OF REAL ESTATE AND PERSONAL PROPERTY.

Real Estate.....	\$111,400.00
Personal Property	67,400.00

FIRES AND ALARMS.

The total of 318 fires and alarms for the year 1904 were attended with a loss on buildings of \$54,349; loss on contents of \$294,795, with an insurance on buildings of \$215,800; insurance on contents of \$1,103,535.

The Dodd & Keifer cattle sheds and cattle loss are not included in city's total, as they are located outside the city.

APPROPRIATION AND EXPENDITURES.

Appropriation for 1904.....	\$76,277.00
Expended.....	76,982.41
Overdrawn.....	\$ 705.41

CONCLUSION.

My acknowledgments are hereby tendered to his Honor, the Mayor, and Commissioners, the Honorable City Council and Committee on Fire Department, for courteous treatment and support.

To the officers and members of the Department, I wish to extend my thanks for their strict attention to duty.

Respectfully submitted.

T. N. WORM,
Fire Marshal.

REPORT ON THE STATUS AND EQUIPMENT.

per tires.

per tired.

Steamer Company No. 1.

- 1 team horses, black and gray.
- 1 double set swinging harness.
- 1 pair horse blankets.
- Second size Ahrens engine.
- 2 9-foot rubber spiral suction, 4-inch.
- 1 12-foot cotton suction, 4-inch.
- 2 branch pipes; 5 tips; 1 hydrant wrench; 1 shovel, 1 14-inch alarm gong; 1 whip and socket.

Hose Company No. 1—

- 1 team gray horses.
- 1 double set swinging harness.
- 1 2-horse hose wagon.
- 1 pair horse blankets.
- 2,000 feet 2½-inch cotton hose; 1 50-foot section 1-inch hose; 1 portable extinguisher; 3 branch pipes; 1 axe; 2 hose lighters; 3 spanners and spanner belts; 4 aluminum fire helmets; 1 American smoke mask; 1 hydrant wrench; 1 leather bucket, 2 Eclipse lanterns and hangers; 1 wagon cover; 1 pair insulated wire cutters; 1 14-inch alarm gong; 1 whip and socket.

Hose Company No. 2—

- 1 team bay horses.
- 1 double set swinging harness.
- 1 2-horse hose wagon.
- 1 pair horse blankets.
- 2,000 feet 2½-inch cotton hose; 1 50-foot section 1-inch hose; 2 branch pipes; 3 spanners and spanner belts; 1 axe; 2 hose lighters; 1 American smoke mask; 100 feet ½-inch rope; 4 aluminum fire helmets; 2 hydrant wrenches; 1 pair insulated wire cutters; 1 rubber bucket; 1 wagon cover; 2 Eclipse lanterns and hangers; 1 14-inch alarm gong; 1 whip and socket.

Hose Company No. 3—

- 1 team brown horses.
- 1 double set swinging harness.
- 1 2-horse hose wagon, roller bearing.
- 1 pair horse blankets.
- 2,000 feet 2½-inch cotton hose; 1 50-foot section 1-inch hose; 2 branch pipes; 3 spanners and spanner belts; 1 hydrant wrench; 1 axe; 2 hose lighters; 4 aluminum fire helmets; 1 pair insulated wire cutters; 1 American smoke mask; 80 feet ½-inch rope; 1

leather bucket; 1 portable extinguisher; 2 Eclipse lanterns and hangers; 1 25-foot extension ladder; 1 11-foot roof ladder; 1 wagon cover; 1 14-inch alarm gong; 1 whip and socket.

Hose Company No. 4—

1 team horses, black and gray.
1 double set swinging harness.
1 2-horse hose wagon, roller bearing, rubber tires.
1 pair horse blankets.
2,000 feet 2½-inch cotton hose; 1 50-foot section 1-inch hose; 2 branch pipes; 3 spanners and spanner belts; 1 axe, 1 hydrant wrench; 4 aluminum fire helmets; 100 feet ½-inch rope; 1 American smoke mask; 2 hose lighters; 1 hose clamp; 1 pair insulated wire cutters; 2 Eclipse lanterns and hangers; 1 wagon cover; 1 leather bucket; 1 14-inch alarm gong; whip and socket.

Hose Company No. 5—

1 team horses, black and gray.
1 double set swinging harness.
1 2-horse hose wagon, ball bearing, rubber tires.
1 pair horse blankets.
2,000 feet, 2½-inch cotton hose; 1 50-foot section 1-inch hose; 3 branch pipes; 3 spanners and spanner belts; 1 axe; 1 hydrant wrench; 4 aluminum fire helmets; 1 American smoke mask; 100 feet ½-inch rope; 2 hose lighters; 1 pair insulated wire cutters; 2 lanterns and hangers; 1 wagon cover; 1 14-inch alarm gong, 1 whip and socket.

Hose Company No. 6—

1 team horses, brown.
1 double set swinging harness.
1 two-horse hose wagon.
1 pair horse blankets.
2,000 feet 2½-inch cotton hose; 1 50-foot section 1-inch hose; 3 branch pipes; 3 spanners and spanner belts; 1 axe; 1 hydrant wrench; 2 hose lighters; 1 pair insulated wire-cutters; 4 aluminum fire helmets; 1 wagon cover; 1 American smoke mask; 1 rubber bucket; 2 Eclipse lanterns and hangers; 75 feet ¾-inch rope; 1 14-inch alarm gong; 1 whip and socket.

Hose Company No. 7—

1 team horses, black and sorrel.
1 double set swinging harness.

- 1 2-horse hose wagon.
- 1 pair horse blankets.
- 2,100 feet 2½-inch cotton hose; 1 50-foot section 1-inch hose; 3 branch pipes; 2 hydrant wrenches; 3 spanners and spanner belts; 1 axe; 1 pair insulated wire cutters; 4 aluminum fire helmets; 1 American smoke mask; 1 leather bucket; 40 feet ½-inch rope; 1 wagon cover; 2 Eclipse lanterns and hangers; 1 14-inch alarm gong; 1 whip and socket.

CITY COLLECTOR'S REPORT

FOR THE YEAR 1904.

*To the Honorable Mayor and City Council
of the City of Peoria, Illinois.*

GENTLEMEN:—I submit herewith for your consideration, my annual report as City Collector for the year ending December 31st, 1904.

The following table shows the amount collected during the year on each warrant, on assessments made prior to the year 1904:

Warrant No.	Improvement	Amount Collected
91	Bigelow St.....	\$ 598.66
92	Ravine Ave. (Knoxville to Indiana).....	329.54
93	Ravine Ave. (Indiana to Wisconsin).....	90.10
95	South Adams St. (South to Western)	374.54
96	North Adams St. (Spring to Cornhill).....	159.66
97	Perry Ave. Sewer.....	51.63
98	South Madison St. (Fulton to Franklin).....	346.06
99	South Elizabeth St. (Moss to Windom).....	415.35
100	South Elizabeth St. (Windom to Main).....	13.42
101	Perry Ave. (Cornhill to Abington).....	1,617.78
102	Callender Ave.....	847.18
103	Ayres Ave.....	491.11
104	Fredonia	904.32
105	Malvern	522.96
106	North St.	1,287.53
107	LaSalle Ave.....	183.78
108	Dechman Ave.....	935.37
109	Indiana Ave. (Glen Oak to Pennsylvania).....	26.83
110	Indiana Ave. (Pennsylvania to Ravine).....	472.52
111	South Adams St. (Lincoln Ave. to South).....	595.09
113	South Adams St. (Cedar to Lincoln Ave.).....	45.14
114	Cooper and Sherman	451.00
115	University St. (Bradley to Barker).....	114.47
116	Bradley Ave	392.23

the year. During the other nine months the Collector has little to do, but he must keep the office open for the accommodation of the public. I suggest, therefore, that the duties of the City Collector could be performed by the City Treasurer, without an assistant or deputy, except possibly for three months of each year, thus saving the salary now paid one official. Respectfully submitted,

J. J. CROWDER,
City Collector.

CITY ELECTRICIAN'S REPORT.

To the Honorable Mayor and Aldermen of the City of Peoria.

GENTLEMEN:—I have the honor to present herewith the annual report of the Electrical Department for the year ending December 31st, 1904:

Extensions and Improvements.

Four new fire alarm boxes were added to the system during the year, namely: Nos. 165, 223, 226 and 241. Box No. 5 was moved from the corner of Monroe and Fayette to the Grand Opera House. Two new police boxes were added, located as follows: At the corner of Elizabeth and Nebraska, and at Peoria and Arcadia.

Equipment.

Number of police boxes and booths.....	58
Number of private boxes.....	7
Number of street fire alarm boxes.....	79
Number of telephone stations.....	32
Number of fire alarm gongs.....	13
Number of public bell strikers.....	3
Number of electric door openers.....	16
Manual transmitter.....	1
Automatic repeater (eight circuits).....	1
Switch board (combination storage battery, twelve circuits).....	1
Patrol operator's table (four circuits).....	1
Police registers (chemical type).....	4

One hundred and fifty-two miles of hard drawn copper wire strung on poles.

Value of Equipment.

Police System.....	\$14,550.00
Fire Alarm System.....	23,988.00
Horse, Wagon and Tools and Supplies.....	295.00

Police Reports, Fire Alarms, Wagon and Ambulance Calls.

Number of reports received from patrolmen.....	190,853
Number of calls received for wagon.....	1,999
Number of miles traveled by wagon.....	3,949 4-12
Number of prisoners carried by wagon.....	1,991
Number of prisoners taken by wagon to house of correction.....	411
Number of calls responded to by ambulance.....	1,574

Number of miles traveled by ambulance	\$ 5,272
Number of patients taken to hospital.....	905
Number of patients taken home	507
Number of patients brought to station.....	34
Number of patients taken to depot.....	97
Number of fire alarms from street boxes.....	130
Number of fire alarms from patrol stations.....	41
Number of fire alarms received from telephone.....	2

The patrol box at the corner of Perry and Laveille Streets was moved to the alley on Laveille between Monroe and Perry, the box at Adams and Franklin and the one at Oak and Adams to the alley on Oak between Adams and Warner.

In my report last year I recommended that money be appropriated to make necessary repairs to our police and fire alarm lines, and no provision being made for it I was obliged to use the money provided for new boxes and extensions for this purpose. We renewed about two hundred and fifty cross arms and made other necessary repairs, getting over about one-third of the system.

We also had necessary carpenter repairs made on twenty-five patrol booths, and it is absolutely necessary that they all be painted this year.

We have equipped fifty-six fire alarm boxes with Smith patent key guards, and have guards on hand to furnish the whole system

Recommendations.

I would recommend that in accordance with the resolution adopted October 18th, 1904, that the sum of eight thousand five hundred dollars be appropriated for the purpose of placing the city's wires underground.

I would also recommend that engine houses No. 1, 2, 3, 4, 5, 6 and 7 be rewired.

I herewith tender my thanks to the honorable Mayor and Aldermen and all persons directly interested in the success of this department for their kind and courteous treatment.

JOHN D. HALL,
City Electrician.

Total number of elevators not included in general permit—freight . . .	1
Number of buildings condemned including two of 1903	10
Number of buildings condemned and removed 7, as follows:	
1 one-story frame building corner Blaine and Antoinette streets.	
1 one-story frame building, 2011 S. Washington street.	
2 one-story frame buildings, lot 7, block 10, Ballance's Addition on Pecan street.	
1 one-and-a-half-story frame building, 205 Callendar avenue.	
1 two-story frame building, lot 19, Sylvan Park Addition, Laveille street.	
1 brick smoke stack, 519 N. Water street.	
Number on which orders have not been complied with 8, as follows:	
1 two-story brick, 225 S. Water street.	
1 one-story frame, lot 10, block 30, original town.	
1 one-and-a-half-story frame, lot 9, block E, McReynold's Addition.	
Buildings ordered repaired and order complied with	5
Elevators ordered repaired and order complied with	20
Fire escapes ordered	37
Fire escapes erected as per order	34

Additional Items.

Buildings to the value of one hundred fifty thousand dollars have been constructed outside of the city limits, over which this department had no control. The buildings were essentially a part of the city, although they are not included within the boundary limits; the materials being furnished and the labor being performed by Peorians for the owners, who are citizens of Peoria.

This together with a great deal of repair work for which no permit was required makes in the aggregate a banner year for the City of Peoria along the lines of building construction. Among the various buildings as, noted above, were the cattle barns at the Corning Distillery, \$27,000.00; Warehouse at the Woolner Distillery, \$30,000.00, and the Iron and Steel Works in East Peoria, \$40,000.00, approximately.

Inspection of Buildings.

Notwithstanding the great amount of work and the large territory over which it is extended, the Superintendent of Building has inspected the various structures and all have been constructed in accordance with the ordinances governing the same as near as possible.

Board for the Inspection of Buildings.

At the beginning of the year, a great deal of inspection was done relating to modes of egress in case of fire. This was deemed necessary on account of the Iroquois Theater fire in Chicago. The Special Fire Commission created by the City Council consisting of the Fire and Water Committee, the Mayor, Fire Marshal, Building Inspector, City Engineer, City Attorney and City Electrician visited the various places of amusement and halls where large numbers of people congregate, and ordered various changes and improvements to be made in the buildings visited. The Board for the Inspection of Buildings, with the City Electrician, continued the work of inspection until nearly all the buildings requiring improvements in the manner of escape in case of fire or panic had been inspected.

The orders of the Special Committee and the Board for the Inspection of Buildings have been practically complied with only a few minor changes ordered have not been made.

The Board has made various inspections of old buildings and their orders to remove or repair, as the case may have been, have been complied with in all but three exceptions upon which extended time was given for the parties interested to make a sale or lease, the Board not considering them dangerous.

The Superintendent of Buildings has kept the office open from 8:00 A.M. to 2:30 P.M., which fact seems to have been appreciated by the patrons of the office. In addition to the various duties of the office, the Superintendent has practically ready, a revised copy of the building laws of the city to present to your honorable body for your consideration in the near future.

Printing the Building Laws.

An amount of One Hundred and Fifty Dollars was included in the appropriation bill of 1904 for the printing of the building laws in pamphlet form for distribution among the various architects, builders and others concerned, but

owing to the fact that the laws as they now exist needed revising, the Superintendent decided not to have them printed, but would respectfully recommend that the sum as above stated be re-appropriated for this purpose as soon as the revised ordinances are passed upon by your honorable body.

Conclusion.

I take this opportunity of returning my thanks to His Honor, the Mayor, the Members of the City Council and the heads of the various departments upon which I have called for favors during the past year for their assistance to me in the discharge of the duties of my office.

Respectfully submitted,

W. F. BENSON,
Superintendent of Building.

REPORT OF SUPERINTENDENT OF PLUMBING.

*To the Honorable Mayor and Members of the
City Council of the City of Peoria.*

GENTLEMEN:—The undersigned Superintendent of Plumbing hereby submits his annual report from January 1st, 1903, to December 31st, 1904, as follows:

Plans approved.....	255
Water tests.....	245
Final inspections	313
Miscellaneous inspections.....	634
Plumbers examined	7
Amount of fees.....	\$429.00

Recommendation.

In order that the different departments pertaining to the construction, re-construction or alteration of all buildings, may work in harmony with one another, I would recommend that the ordinances governing them be changed so that the plans and specifications of all buildings be first submitted to the Department of Health and stamped with their approval before the Superintendent of Building shall issue any building permit. In this way plans of the drainage and ventilation of all buildings would have to be passed upon and left on file at this office. Under the ordinances now in force the building is up and partly constructed before there are any drainage or ventilation plans submitted and in many cases there are mistakes made in planning sanitary appliances and the ventilation of rooms in which they are to be placed. Under those conditions there is much confusion at times to the detriment of those most interested.

As recommended in my last report and endorsed by the Board of Health, an ordinance regulating the construction and inspection of sewers has been prepared, but as yet noth-

ing has been done with it. This is very necessary to the health of the public and the protection of the paved streets.

I desire to return thanks to His Honor, the Mayor, and members of the City Council, and the Department of Health, and the Health Commissioner, Dr. H. M. Hayes, for the courteous treatment and assistance given me in the performance of the duties of this office.

Respectfully submitted,

E. H. DONAHOE,
Superintendent of Plumbing.

REPORT OF HEALTH COMMISSIONER.

PEORIA, ILL., January 1, 1905.

To the Honorable Mayor and City Council of the City of Peoria.

GENTLEMEN—In accordance with the provisions of the city ordinances I herewith submit the following report for your consideration:

The general public is conversant with the nature of the work required of this department of the city administration, while but few fully appreciate the obstacles it has to contend with in the performance of its natural functions.

The weeds, the privy-vaults, antiquated closets, obnoxious cess-pools, garbage, ashes, dead rats and chickens, and many pestilent acts of indifferent and selfish people, have been rehearsed from year to year, and need not be dwelt upon at this time.

The general cleaning up and abatement of these nuisances, coupled with strenuous efforts to prevent a recurrence, has been one of the prime purposes of this department. The corps of officers on duty in the Department of Health has been vigilant and watchful and any violation of the ordinance has been met with summary treatment.

I am convinced that while Peoria is busy with new bridges and new franchises (perhaps all needed) the most vital improvement necessary at this time is some method, either public or private, of handling and disposing of night soil and garbage, and compelling a uniform action by all the people in this regard.

Many cities in this and other States, with less population and less importance, compel the people to supply themselves with tight covered metal boxes or pails, into which all decaying garbage and refuse must be placed, and kept in some convenient spot, from which the city scavengers remove it each day, or as often as necessary. This would

be an improvement over our present system of allowing people to dump disease germs wherever most convenient, even to the discomfort and danger of the common populace. In weight, about 14 per cent. of refuse production in American cities is garbage and 8 per cent. rubbish. The average weight per day of garbage is one pound per capita. The experience of cities having established crematories is to the effect that this matter is absolutely disposed of at a cost of 35 cents per ton, being 20 cents for labor and 15 cents for fuel. In my opinion it will be only a question of a few years until some final solution of this question must engage the attention of the authorities in this city.

Detention Hospital.

I deem it my duty at this time to call your attention to the spot where we detain and care for patients with infectious and contagious diseases. We call it a "Detention Hospital." We have successfully detained many people under its roof, and through the agencies of kind providence, and the administering of skillful nurses, the results have been highly satisfactory.

Mrs. Voris, the matron, has proven herself to be highly competent and painstaking, even tempered and cleanly; and under her ever watchful care the best results possible have been attained. Not one single case placed under her care has resulted fatally.

While these things are encouraging the fact still remains that we have been compelled to detain patients with diphtheria and scarlet fever under the same roof with small-pox; and the roof very imperfect at that. We have been patching continually to prevent untimely and unintentional baths. It has been difficult to keep the place warm in cold weather with an inadequate number of poor stoves, and on one occasion it was found necessary to barricade the place with rocks to prevent the whole thing from making a floating expedition toward the gulf. At the time the present place was built an emergency existed, and this was doubtless the best way out of it at the time. Like all other

things it has had its day, and the growth and changing conditions seem to demand at this time or in the near future, a building suitable to the needs of the present day. It should be located on high ground, away from the river, a more substantial building, and divided into compartments, so that patients can be treated for one disease without being exposed to some other, perhaps more serious.

I am pleased to report that the death rate is lower than that of last year; being 11 to each 1,000, as to 11 $\frac{1}{2}$ ‰ for each 1,000 in 1903. It will be seen that there were 884 deaths in 1904 and 772 in 1903, but the increased population has reduced the percentage below that of 1903.

The following table shows the number of patients treated at the Detention hospital each month during the year:

Tuberculosis.

It seems appropriate at this time to call your attention to the efforts being made by the Board of Charities in conjunction with the Board of Health and Medical Association, to stay the progress of "the great white plague," and an ordinance will be presented to your honorable body in the hope that you will give it favorable consideration, and sanction the laudable work thus begun by passing this or some other ordinance in support of the effort. While this is purely local in its scope, it is prompted by the fact that the

spread of tuberculosis and the fatality of the disease throughout the whole country has become alarming and many State Boards of Health are giving the matter close attention and study. The theory in vogue for years that people afflicted with pulmonary tuberculosis must flee to some higher altitude for relief has been eradicated, and the consensus of opinion in high medical authorities is to the effect that if taken in its incipency, pulmonary tuberculosis can be cured in Illinois.

To this end, the State Medical Society has established a tent colony near Ottawa in LaSalle County. It is not for the purpose of financial gain, nor is it a so-called charitable institution; at the same time all medical services are gratuitous. The prime object is for the purpose of demonstrating that tuberculosis can be cured in our own climate, and also, if possible, induce the Legislature to establish a sanitarium for the poor who are thus afflicted.

Last summer the Associated Charities of Peoria, in the course of their line of duty, were brought face to face with conditions more serious than had ever before been realized, and under the direction of Dr. S. M. Miller, a thorough search of the records in the Health Department resulted in a report made by the doctor in which he not only sets forth the facts, but describes the localities where it is most prevalent, and after careful and intelligent discussion of the awful consequences, offers a remedy, and the substance of this remedy is embodied in the following ordinance, which will be submitted to your honorable body for your approval.

Be it ordained by the City Council of Peoria:

SECTION 1. That pulmonary tuberculosis is hereby declared to be an infectious and dangerous disease to the public health. It shall be the duty of every physician in this city to report to the Board of Health in writing, giving the name, age, sex, occupation and address of every person having such disease, who has been attended by, or who has come under the observation of such physician within one week of such time. It shall also be the duty of commissioners, managers, principals, superintendents or physicians of every public or private institute in this city to

report to the Board of Health in writing, or to cause such report to be made by some competent person, the name, age, sex, occupation and last address of every person affected with this disease, and of the authorities of public and private institutions to reserve and enforce sanitary rules and requirements to prevent the spread of pulmonary tuberculosis, that may be deemed necessary by the Board of Health.

SEC. 2. Whenever any apartments that have been occupied by one suffering with pulmonary tuberculosis shall be vacated by death or removal of the patient, it shall be the duty of the attending physician, members of the family, and landlord, or some one of them, forthwith to report such vacation to the Board of Health, which Board shall promptly send an officer to the premises for a careful inspection thereof. The officer so detailed shall proceed at once to cause said premises to be disinfected and renovated in such manner as the Board of Health shall deem necessary to put the same in a perfect sanitary condition. The work necessary therefor shall be done under the supervision of the Board of Health, subject to its approval, and at the expense of the family to which the patient belongs. Provided that in cases where such family is unable to bear the expenses thereof, the same shall be done by the city without charge.

The Dairy Department.

The milk department under the supervision of A. V. Whitney has been conducted in a very satisfactory manner. It has been, from the start, a campaign of education. By intelligent and systematic work, much has been accom-

plished by way of awakening a public interest and directing the attention of dairymen and dealers to the importance of their calling and the danger with which it is fraught if the most minute details are neglected.

During the year there have been five hundred and seventy samples collected and examined as follows:

January	25
February.....	17
March	37
April	55
May	59
June	84
July.....	78
August	58
September	40
October.....	36
November.....	32
December.....	39
Total	570

The average percentage of butter fat for the entire lot was 3.6. While this is a trifle above the requirements of the ordinance, it is not a fair showing for the majority of the supply offered on the market, for the reason that in the early part of the year a few people got the "get-rich-quick" fever, and no one will ever know just how long this was continued before their thirst was satiated by settlements in the police courts. Some of the samples thus discovered were so thoroughly watered and skimmed that it would make good bluing for a laundry. This, of course, reduced the general average.

A large number of dairies were visited during the year, and here is where discoveries were made which led to much agitation. By invitation I made a number of trips with the inspector to the country dairies, and came back fully convinced that the duties of a milk inspector required diligent and consistent work.

A set of rules for the instruction of producers and distributors has been published and mailed to every person

known to handle milk and cream for consumption in this city, and it will be our future purpose to insist on a reasonable compliance.

Report of Visiting Nurse for Year Ending December 31, 1904.

Total number of patients cared for.....	366
Total number of visits made	2024
Total number of baths given	1122
Total number of surgical dressings done.....	452
Total number of articles loaned (hundreds).	
Sheets, gowns, towels, etc.....	157
Cots, beds, air cushions, etc.....	64

The above list of statistics will convey a fair idea of the work done by the nurse employed by the Associated Charities. In every case the visiting nurse tries to teach the people to care for their own sick, instructing in sanitary laws and in the proper preparation of foods. In the work among patients suffering from tuberculosis the nurse has a better opportunity than any one else to teach the people about the disease, the need for good diets, fresh air, hygienic living and disinfecting. It is wonderful how willing the poor people are to grasp the idea of importance in this matter.

The visiting nurse takes this opportunity of thanking the Hon. E. N. Woodruff, Mayor of Peoria, for the many pounds of ice which he furnished free to so many of the poor people during the summers of 1903-4. Also to thank the City Council for book of car tickets given her each month.

Respectfully submitted,

JESSIE M. KEYS,
Visiting Nurse.

From records kept by W. A. McMillan, our fumigator, there has been during the year 272 cases of diphtheria, and 238 recovered. There were 92 cases of scarlet fever of which 88 recovered. Of small-pox we had 37 cases and all recovered. We have now under quarantine eight cases of diphtheria, six cases of scarlet fever and three cases of small-pox. The last three named are in the Detention hospital, and every home except those under quarantine have been thoroughly disinfected.

During the year there were 8,291 inspections made by this department, not including plumbing, or dairies, cutting of weeds or trimming of trees.

Bacteriological Laboratory.

It is the desire of every citizen and professional man in the City of Peoria to keep abreast with modern progress, and we are proud of the many advances our metropolis is making. I regret to say, however, our Health Department is especially lame in one particular, that of a well equipped bacteriological laboratory. We should be prepared to make bacteriological examinations for diseases of known microbic origin, such as pulmonary tuberculosis, typhoid fever, diphtheria, etc. This, however, would necessitate the Commissioner spending most of his time in the laboratory, which he could not afford to do at the present stipulated remuneration. In most cities the size of Peoria an able bacteriologist is a permanent fixture in the Health Department, as it should be in our city. This would materially assist our busy physicians, who have not the time to personally make such investigations in questionable cases, thus enabling them to make a positive diagnosis, saying nothing of the heartaches resulting from possible errors. You may answer that the funds in this department will not justify the necessary expenditures to accomplish the above results, but gentleman, no expense is too great when it comes to a matter of guarding the public health against pestilential infections and death.

In conclusion I wish to thank my subordinates connected with the department for their courteous deportment and willing assistance at all times.

Respectfully submitted,

HARRY M. HAYES,
Commissioner of Health.

POLICE DEPARTMENT.

To the Honorable Mayor and City Council.

GENTLEMEN:—I have the honor to submit herewith to your honorable body the annual report of the Police Department for the year ending December 31st, 1904.

Much of the work of the Police Department which in itself demands much thought, research and labor, is performed in the office of the Chief of Police, and although fully recorded upon the archives of the office, cannot be enumerated or published.

The force, as described hereafter, has done its duty nobly, but under the growing population and the territory of our city, and the constant requests for police protection from citizens in the newly built up sections, and our utter inability to extend the precincts as at present constituted, they being already larger than they should be, with the force of patrolman at my disposal, I believe the time has come when the force should be considerably augmented, and respectfully recommend that about thirty more patrolmen be appointed.

The discipline of the department during the past year has been most excellent, and the charges preferred against officers were very rare and in most cases of a very trivial nature. I have had three men discharged for drunkenness during the past year, that being the most serious charge preferred against any officer.

I deeply regret having to chronicle the death of Officers Campbell, Martin and Pulsipher during the year. Officer Campbell had been a member of the department for about eighteen years, and was always a very capable and efficient officer.

Officers Martin and Pulsipher, while not connected with the department as long as Officer Campbell, were nevertheless excellent officers.

I would also recommend the building of a modern patrol and ambulance house as the present structure used for that purpose is inadequate, unsanitary, unhealthy and dangerous, in fact it should be condemned and torn down, as one of the walls bulges from six to eight inches.

I have recently called the Building Inspector's attention to the dangerous condition of this building and if we continue much longer the use of it in its present condition I am satisfied that an accident will happen that will in all probability cost the city more than it would to build a modern and up-to-date patrol and ambulance house.

I have within the past year had the patrol and ambulance repaired and painted and at the present time they are in excellent condition. Our horses are all young and in good condition, in fact we have at the present time the best horses the department has ever had.

The Department.

The Police Department is composed as follows:

The Mayor Ex-Officio Commissioner	1
Commissioners	2
Clerk of Police and Fire Board	1
Superintendent	1

HOUSE OF CORRECTION.

REPORT OF INSPECTORS.

To the Honorable City Council of the City of Peoria.

GENTLEMEN:—We have the honor to present herewith the annual report of the House of Correction for the period ending December 31st, 1904. We append hereto the report of the Superintendent and the County Physician (the latter officer being the attending physician of the institution) and make them a part of our report.

The usual good care and attention has been given the inmates, and their welfare has never been lost sight of and punishment has been administered only as a last resource; an occasional reprimand seems to be all that is necessary to carry out our rules and maintain good order.

We have endeavored during the past year to maintain the high sanitary condition of the institution. Its condition as to cleanliness has at all times been excellent.

The general health of those confined in the institution during the past year has been remarkably good considering the physical condition when received. The regular hours to retire and arise, with a variety of plain but substantial food, including vegetables, serve to fulfill their purpose in improving the physical condition of those committed to our care. We have had no cases of contagious disease.

It is a matter worthy of note that while our population for the year 1904 was 535, it being an increase of 138 more than the previous year, we had no deaths during the entire year.

The report of the physician will give complete information relative to the sickness of the inmates.

During the year from March 25 to April 12 we were surrounded by water from the Illinois river, which did

great damage to the property and material. The fences on the west were all washed away, causing us to build 1,320 feet of new fence, rebuild blacksmith shop, new wall under barn and new bleach house.

We call your special attention to the fact that all the repairs made, together with the work of every character performed about the institution has been done by our own inmates under the supervision and direction of their respective instructors.

Our motto is work, believing that there can be but little or no correction without it, and that a reasonable amount of work promotes habits of industry, teaches the person a useful employment, and in many instances starts him on the road to a profitable and honorable career and enables the city to be partly recompensed for the care and maintenance of those who have transgressed its laws or the laws of the State.

The employment given the men of the institution is brick making in summer months and broom making in winter months. There has been paid over to the City Treasurer \$6,035.23 for the year 1904.

As to all other matters in detail we respectfully submit the report of the Superintendent and make them a part of our report.

Respectfully submitted,

E. N. WOODRUFF,
ADOLPH WOOLNER, JR.,
A. V. THOMAS,
FRANK BAKER,

Inspectors.

SUPERINTENDENT'S REPORT.

*To His Excellency, R. Yates, Governor of Illinois,
and the Honorable City Council of the City of Peoria.*

GENTLEMEN:—I have the pleasure to submit my annual report as Superintendent of the House of Correction, it being for the fiscal year ending December 31, 1904.

The following tables show in detail all necessary facts of the business of the year:

PHYSICIAN'S REPORT.

*To the Honorable Board of Inspectors of the
House of Correction of the City of Peoria.*

GENTLEMEN:—I herewith submit my report for the year 1904—January 1st to December 31st.

The general health at this institution has been above the average of former years during my service. Excellent sanitary conditions are maintained and no epidemic diseases have gained hold during the year. Few cases of sickness have occurred, other than with those whose condition on entrance was, from previous exposure, accidents or injuries, already bad.

I wish to commend the Superintendent and his able corps of assistants on the way in which the inmates are managed, and especially with reference to the excellent system of employment, selection of food and general care of bodily vigor which are so essential to confined persons and should be maintained in every prison.

While I have been called several times to attend at this institution much of the work has been minor surgical in nature and no deaths have occurred.

Five were removed to hospitals for treatment.

In every way I consider this institution well and efficiently managed from every point of view.

Respectfully yours,

FRANK B. LUCAS,
County Physician.

The statistics hereby submitted for the year ending December 31st, 1904, are as brief and comprehensive as possible, endeavoring, however, to present a complete statement of work done in the different departments during the year just closed.

The most encouraging item in the past year's history of the House of Correction is the remarkable degree of good health among the inmates.

During the year we received 535 prisoners, and I can not refrain from drawing your special attention to the fact that we had no escapes. This is proof of the strict attention paid by the officers employed.

Religious services were conducted each Sabbath afternoon by Mr. E. McDermant, August F. Klein and others who kindly assisted them. And their meetings I believe are a great benefit to the inmates. Our thanks are due for their continued interest in these unfortunate ones.

In conclusion I acknowledge my obligations to the Hon. Mayor E. N. Woodruff, Frank Baker, A. V. Thomas and Adolph Woolner, Jr., for their uniform kindness and hearty co-operation in all of the arduous duties which have come to me as superintendent of this institution.

I also desire to thank Mr. E. S. Willcox, public librarian, and Mrs. B. F. Cartwright, Mrs. Lindsay McCoy, Robt. W. Dwyer, Dan R. Sheen and Thos. H. Detweiller and others for books, magazines and papers.

I also desire to thank the ladies of the W. C. T. U. for their generous donation of flowers and papers.

Respectfully submitted,

JOSEPH BRODMAN,
Superintendent.

REPORT OF BOILER INSPECTOR.

To the Honorable Mayor and Aldermen of the City of Peoria.

By furniture	64.25
By insurance	180.00
By tools	3.10
By salaries and wages	9,073.64
By petty cash on hand	31.94
	<hr/>
	\$ 18,360.26

The Peoria Public Library employs regularly one chief librarian and eight assistant librarians in the library proper, one night assistant, one foreman and three assistants in its bindery, and one engineer and one janitress.

If the expenditures seem large, it should be borne in mind that with a collection of over 90,000 volumes, 300 periodicals regularly taken and a yearly issue to our public of 175,000 volumes for home use this library ranks among the largest, most generously equipped and best patronized libraries in the United States. It is in reality a people's col-

lege, supplying a post-graduate course to our public schools, private schools and higher institutes of learning, indeed to all classes of inquiring students.

I do not think it improper to add that among all the public libraries whose annual reports come to hand I know of none of our size that shows better results with so small a force, that has a more intelligent, obliging and efficient body of assistants, none more flatteringly appreciated by their patrons or more ungrudgingly supported by the city fathers than is the Peoria Public Library.

E. S. WILLCOX,
Librarian.

REPORT OF FOOD INSPECTOR.

To the Honorable Mayor and City Council of the City of Peoria.

GENTLEMEN:—I have the honor to present herewith the annual report of Food Inspector for the year ending December 31st, 1904:

Number of meat markets inspected.....	114
Number of slaughter houses inspected.....	2
Number of packing houses inspected.....	3
Number of wholesale commission houses inspected.....	14
Number of dressed chicken depots inspected.....	3
Number of wholesale meat depots inspected.....	5
Number of bakeries inspected.....	46

All of which I found in a clean, healthy condition.

Respectfully submitted,

B. KLUEVER,

Food Inspector.

REPORT OF CITY SEALER.

To the Honorable Mayor and Board of Aldermen:

GENTLEMEN:—I have the honor to submit herewith to your honorable body the annual report of the City Sealer's department for the year ending December 31, 1904:

Total scales inspected.....	962
Scales condemned, principally meat scales.....	82
Number of dry measures inspected.....	1,253
Condemned.....	147
Number of wine measures inspected.....	581
Condemned.....	59
Out of the 82 condemned scales, 87 have been fixed over.	

Respectfully,

CHAS. FRANKEL,
City Sealer.

CITY ATTORNEY'S REPORT.

Fuller to make assessment; assessment roll filed; default and decree of confirmation entered Jan. 30, 1904; contract let and improvement completed; order of rebate of 10% entered Sept. 26, 1904.

- 4280 In the matter of the petition of the City of Peoria for the widening of Chambers Avenue from Flora Avenue to North Street; ordinance passed Jan. 12, 1904; petition filed Jan. 14, 1904; order entered Jan. 14, 1904, appointing Geo. J. Jochem, Joseph Wilhelm and Henry C. Fuller, commissioners; assessment roll filed Feb. 25, 1904; order on all parties to file objections by May 17, 1904; legal objections waived and questions pertaining to compensation and damages submitted to court without a jury; finding by the court; motion by petitioner to dismiss now pending.
- 4282 In the matter of the petition of City of Peoria for the improvement of California Avenue on both sides thereof from Pennsylvania Avenue to Illinois Avenue, with cement sidewalk; petition filed and order appointing H. C. Fuller to make assessment Nov. 6, 1903; assessment roll filed Nov. 24, 1903; rule on all parties to file objections by Jan. 2, 1904; legal objections to estimate of engineer sustained; appealed by City February term, 1904, to Illinois Supreme Court; judgment of County Court sustained.
- 4284 In the matter of the petition of the City of Peoria for the improvement of Brotherson Street from East Saratoga Street to the public alley in Block 15, Berrien's Addition, with cement walk; petition filed and order appointing H. C. Fuller to make assessment roll Nov. 29, 1903; assessment roll filed Jan. 18, 1904; default and confirmation Feb. 10, 1904; contract let and improvement made.
- 4301 In the matter of the improvement of Prairie Street from Fisher Street to State Street in the City of Peoria with brick pavement; ordinance passed November 24, 1903; petition filed January 5, 1904; order appointing Fuller to make assessment; order of default and confirmation March 7, 1904; contract let and improvement made. Order of rebate of 5% entered January 17, 1905.
- 4304 In the matter of the petition of City of Peoria for the improvement of Reed Avenue from Spencer to Prairie Street, brick pavement; ordinance passed January 19, 1904; petition filed January 21, 1904; order of default and confirmation April 7, 1904; contract let and improvement made; order of rebate of 4% December 21, 1904.
- 4306 In the matter of the petition of the City of Peoria for improvement of Smith Street from Steubenville Street to Reed Avenue with brick pavement. Ordinance passed January 26, 1904; petition filed January 30, 1904; dismissed May 7, 1904, for insufficient engineer's estimate.
- 4320 In the matter of the petition of the City of Peoria for the improvement of East Armstrong Avenue from Knoxville Avenue to Glen Oak Avenue. Ordinance passed September 15, 1903; petition filed March 10, 1904; order appointing H. C. Fuller to make assess-

ment same day; rule on all parties to file objections by May 4, 1904. Order of default and confirmation. Contract let and improvement completed. Order of rebate of 7%.

- 4321 In the matter of the petition of City of Peoria for opening and extending alley from Globe Street to Monson Street, in Block 3, Pulsifer's 1st Addition. Ordinance passed March 8, 1904; petition filed March 10, 1904. Now pending in County Court and under advisement on legal objections.
- 4324 In the matter of the petition of City of Peoria for the improvement of Oak Street from Depot Street to South Adams Street, with brick pavement; ordinance passed March 22, 1904; petition filed March 26, 1904. Order appointing H. C. Fuller to make assessment; assessment roll filed March 30, 1904; rule on all parties to file objections April 19, 1904; dismissed for insufficient estimate May 7, 1904.
- 4325 In the matter of the petition of the City of Peoria for the improvement of Oak Street from Adams Street to Reed Avenue; ordinance passed March 22, 1904; petition filed March 25, 1904; order appointing H. C. Fuller to make assessment March 26, 1904; order of default and confirmation April 19, 1904; contract let and improvement made.
- 4326 In the matter of the petition of the City of Peoria for the improvement of various streets in the City of Peoria by the construction of North Peoria Sewer, East Section; ordinance passed March 29, 1904; petition filed in County Court April 2, 1904; legal objections overruled August 4, 1904; hearing as to benefits before the court without a jury; assessment roll filed May 6, 1904; contract let by Board of Local improvements October 18, 1904.
- 4339 In the matter of the petition of the City of Peoria for the improvement of Nebraska Avenue from Knoxville Avenue to North Street; ordinance passed March 8, 1904; petition filed April 5, 1904; proceedings dismissed by petitioner August 5, 1904.
- 4341 In the matter of the petition of the City of Peoria for the improvement of the alley in Block 66, Monson & Sanford's Addition; ordinance passed April 12, 1904; petition filed April 14, 1904; order appointing H. C. Fuller to make assessment April 14, 1904; assessment roll filed; order of default and confirmation May 5, 1904; contract let and improvement made.
- 4342 In the matter of the petition of the City of Peoria for the improvement of South Glendale Avenue from Main Street to Monson Street; ordinance passed April 12, 1904; petition filed April 14, 1904; proceedings dismissed by petitioner.

Avenue to Illinois Avenue, with cement sidewalk 6 feet wide; ordinance passed August 16, 1904; petition being prepared.

In the matter of the petition of the City of Peoria for the improvement of south side of Sixth Avenue from east curb line of Elliott Street to west line of No. 904 Sixth Avenue; ordinance passed August 16, 1904; petition being prepared.

In the matter of the petition of the City of Peoria for the improvement of northwesterly side of Jefferson Avenue (north) from northeasterly curb line of Abington street northeasterly to the northwesterly line of Adams Street (north) thence northeasterly along the northwesterly side of Adams Street (north) to city limits; ordinance passed May 10, 1904; petition being prepared.

In the matter of the petition of the City of Peoria for the improvement of both sides of Monroe Street from Mary Street to Cornhill Street, and the west side of Cornhill Street from Monroe Street to Perry Avenue, with cement sidewalk 6 feet wide; ordinance passed June 14, 1904; petition being prepared.

In the matter of the petition of the City of Peoria for the improvement of Van Buren Street from North Jefferson Street northwesterly to city limits, with cement sidewalk 6 feet wide; ordinance passed August 30, 1904; petition being prepared.

In the matter of the petition of the City of Peoria for the improvement of the north side of Nebraska Avenue from Knoxville Avenue to Missouri Avenue; both sides of Peoria Avenue from a line 6 feet south of the north line of Nebraska Avenue to Frye Avenue with cement sidewalk 6 feet wide; ordinance passed August 16, 1904; petition being prepared.

In the matter of the petition of the City of Peoria for the improvement of north side of McClure Avenue from Knoxville Avenue to North Street; west side of Bigelow Street from McClure to Virginia Avenue; north side of Virginia Avenue from Bigelow Street to Knoxville Avenue, with cement sidewalk 6 feet wide; ordinance passed August 16, 1904; petition being prepared.

Branch Circuit Court.—Common Law.

- 4030 Daniel Allmon *vs.* City of Peoria; suit for \$3,000 damages for personal injuries by broken gas main in Knoxville Avenue; third trial before a jury; verdict for \$275 against the City; motion for new trial on file and undisposed of; settlement made by plaintiff with City through City Council as per files of City Clerk; settlement to be taken care of in 1905 appropriation.

-
- 4171 Honora Allmon *vs.* City of Peoria *et al.*; suit for \$2,000 damages for personal injuries occasioned by broken gas mains in Knoxville Avenue; on plaintiff's motion at November term stricken with leave to reinstate; involved in settlement of case No. 4030, above mentioned.
- 4172 Mary McDonough *vs.* City of Peoria; same as No. 4171.
- 4373 Joseph Allmon *vs.* City of Peoria; same as No. 4171.
- 4174 Catherine Allmon *vs.* City of Peoria; same as No. 4171.
- 4175 Elizabeth Allmon *vs.* City of Peoria; same as No. 4171.
- 4176 Eveline Allmon *vs.* City of Peoria; same as No. 4171.
- 4452 John H. Bristol *vs.* City of Peoria; suit for \$3,000 damages to real estate by change of grade in Saratoga Street, corner of Seventh Avenue; pleadings settled; pending.
- 4566 Jeanette Woodruff *vs.* City of Peoria; suit for personal injuries alleged to have been sustained by reason of defective pavement in North Adams Street at intersection of St. Giles Street; trial before jury, resulting in verdict against the City for \$57.00; settlement made by payment of \$57.00; judgment satisfied of record.
- 217 Ross E. Lumley *vs.* City of Peoria; action in case for \$3,000 for personal injuries alleged to have been sustained on Sanford Street; pleadings settled.
- 226 Frank Coy *vs.* City of Peoria; action in case for \$10,000 for personal injuries alleged to have been sustained on South Adams Street.
- 171 Samuel H. Miskimen *vs.* City of Peoria; action in case for personal injuries alleged to have been sustained by falling down cellar-way on South Adams Street.
- 118 Isabelle F. Newton. *et al., vs.* City of Peoria; action in case \$5,000 alleged damages for removal of lateral support by excavating Saratoga Street between Moss and Seventh Avenue; pleadings unsettled; pending on demurrer.
- 229 City of Peoria *vs.* Levi B. Doud, *et al.*, suit brought to January term 1905, to recover \$10,000 costs and expenses by the City of Peoria in abating and destroying public nuisance June 4 to June 18, 1904, at Corning distillery; destroying several thousand carcasses of partially burned cattle; declaration filed and service on all parties except Levi B. Doud.

In Chancery.

- 2714 Central National Bank *vs.* City of Peoria; for injunction and relief to restrain the City from interfering with occupancy and possession of a triangular piece of land in North Water Street at the intersection of Fayette Street, claimed by the City as a part of the Public Levee; pending before Master, awaiting Master's report.
- 2729 Chicago, Rock Island & Pacific Railway Co. *vs.* City of Peoria; for injunction and relief to restrain City of Peoria from interfering with occupancy and possession of certain land in South Water Street between Fulton and Liberty Street, claimed by the City to be a part of the Public Levee; pending on pleadings and waiting decision of the Master in the case of Central National Bank *vs.* City of Peoria, *supra*. The decision of that case will decide this case. The questions involved are identical, except that in this case the railway company has recognized the title of the city to this land in and by what is commonly known as the Rock Island Levee lease, from the City of Peoria.
- 2737 John McGinnis *vs.* City of Peoria; for injunction and relief to restrain the City of Peoria from expending money on roads outside of the City of Peoria without the supervision and direction of the municipal authorities; order of reference; pending before Master; testimony not yet taken.
- 194 Jacob Muller *et al.*, *vs.* City of Peoria; for injunction and relief; suit filed September 10, 1904; to restrain City of Peoria from increasing its municipal indebtedness in and about the erection of the proposed new bridge to take the place of the old Lower Free Bridge and to span the Illinois River at the foot of Bridge Street. December 30, 1904, motion filed by City for leave to file supplemental answer and amendment to original answer and to set aside order of reference to Master; pending decision by the court as to said motion.

Illinois Supreme Court.

City of Peoria *vs.* John Ohl *et al.*; appealed by City from ruling of County Court holding estimate of Engineer not sufficiently itemized in matter of cement sidewalk improvement proceedings in California Avenue between Illinois Avenue and Pennsylvania Avenue. (See case 4,282 in County Court referred to above.) Order of County Court sustained.

United States Circuit Court.
(Northern District of Illinois, at Peoria.)

Peoria Gas Light & Coke Co. *vs.* City of Peoria; for injunction and relief to restrain the City of Peoria from enforcing the maxi-

mum gas rate ordinance referred to in following case; pleadings are settled; pending awaiting decision of the Peoria Gas & Electric Company's suit above described.

N. B.—Since the filing of this suit, the Peoria Gas Light & Coke Company has been absorbed by the Peoria Gas & Electric Company.

United States Supreme Court.

Peoria Gas & Electric Company vs. City of Peoria; for injunction and relief: "The Gas Case"; to restrain the city from enforcing its 75 cent maximum gas rate ordinance; decree by United States District Judge, J. Otis Humphrey, rendered at Peoria, February 8, 1904, holding the complainant company an illegal combination contrary to the Anti-Trust Law of Illinois, and holding said complainants to be without any equity in said bill and ordering said bill dismissed. Decree signed and filed February 9, 1904; defendants pray for and were allowed appeal to the Supreme Court of the United States; pending in said Court on complainant's appeal.

N. B.—As noted in former report by the City Attorney, this is one of the most important cases that the City of Peoria has ever been interested in. The City has won this case in the trial court and the City will win it in the United States Supreme Court, if the City's rights and interests are carefully looked after by succeeding City Attorneys; and provided, further, the City Council, until the case shall be decided, takes no unfavorable action which will, in any way prejudice or injure the rights or interests of the City therein. There is no question but that if this case is properly handled before the court, the decision of Judge Humphrey will be sustained.

The foregoing report does not include any business necessarily transacted in the Police Magistrate's and in the Justices' of the Peace Courts for violations of the various ordinances of the City of Peoria.

Your honorable body from time to time, in and by the various reports from such courts before whom such prosecutions have been had, has been fully informed of the business therein transacted, and no attempt is here made to again report with respect to such business, except, however, that for full and detailed information if desired, reference is hereby respectfully made to the aforesaid reports from said courts, which are on file among the City's records.

Reporting further, your City Attorney would respectfully call the attention of your honorable body to the vast amount of legal work which is now devolving upon the Legal Department of the city government. Interests of vast and far-reaching importance to the city have, especially during the last two years, rapidly accumulated, and as the city continues to grow in size and importance it must necessarily follow that the demands which must be made upon the Legal Department will correspondingly multiply.

It is impossible to expect the City Attorney with but one assistant, to properly take care of and conduct all litigation in which the City is or may become involved, prepare local improvement ordinances for the Board of Local Improvements and conduct local improvement litigation through the courts, advise the Council and its committees and the heads of the departments, and be in attendance at each meeting of the City Council. Since May 5th, 1903, I am pleased to report to you, that up to this time, I have been absent from but three council meetings.

The importance of this matter is such that in your unquestioned wisdom you have deemed it advisable and necessary to retain and employ for my predecessor, as well as for myself, associate counsel to assist in the conducting of the celebrated Seventy-five Cent Rate Gas Case (referred to above in this report) which was begun in the United States Circuit Court for the Northern District of Illinois at Peoria, September 18, 1900, and which is still pending and undisposed of on appeal, taken by the Peoria Gas & Electric Company, to the United States Supreme Court, and which should, within the term of my successor, be reached and disposed of.

In like manner it will continue to occur from time to time, that special or associate counsel will be needed in similar and other important cases, and it will undoubtedly, in such cases, be true as it has been in the past, that the fees and expenses of such special or associate counsel will amount to more than would be the necessary and reasonable

amount to retain and employ corporation counsel by the year.

I therefore beg to be permitted to now respectfully recommend that steps be taken immediately by your honorable body to enlarge the facilities of this department, and, to that end, that an ordinance be prepared, passed and adopted providing for the office of Corporation Counsel for the City of Peoria, in addition to and as an auxiliary to the offices of City Attorney and Assistant City Attorney (and stenographer) as are now provided for; and, to this end, that the necessary provisions be made in the 1905 Annual Appropriation Bill of the City of Peoria to provide for the employment and remuneration of legal ability of the highest order to occupy and perform the duties of the office of Corporation Counsel for the City of Peoria.

Very respectfully submitted,

WALTER H. KIRK,
City Attorney.

REPORT OF BOARD OF TRUSTEES OF FIREMEN'S PENSION FUND.

*To the Honorable Mayor and Aldermen of the
City Council of the City of Peoria.*

GENTLEMEN:—We have the honor to submit herewith to you the annual report of the Board of Trustees of the Firemen's Pension Fund, from January 1st, 1904, to February 5th, 1905.

Respectfully submitted,

WALTER H. KIRK, President.

ROBERT JOOS, City Clerk.

WM. P. GAUSS, Treasurer.

W. G. OLWIN, City Comptroller, Sec'y.

THOMAS N. WORM, Chief of Fire Dept.

Board of Trustees of Firemen's Pension Fund.

To the Firemen's Pension Board.

GENTLEMEN:—I have the honor to submit herewith to you for your examination and approval my annual report of the transactions of the Firemen's General and Miscellaneous Pension Fund.

The following is a complete statement of the receipts and expenditures from January 1st, 1904, to February 5th, 1905, closing the books for the year.

Very respectfully,

WM. P. GAUSS,

City Treasurer.

Receipts of the Firemen's General Pension Fund.

Memorandum.

Among the items of Miscellaneous Expenses will be found an item of \$830.40. This was paid for new moving pictures for the Fire Department, rendered necessary by the wearing out of the old moving pictures taken a number of years ago and also includes the expense of a thoroughly new and up-to-date moving picture projecting machine.

REPORT OF THE
COMMISSIONER OF PUBLIC WORKS
FOR THE YEAR 1904.

To the Honorable Mayor and City Council of the City of Peoria.

GENTLEMEN:—I herewith submit my report as Commissioner of Public Works for the year, from December 1st, 1903, to November 30th, 1904, both inclusive.

It has been my earnest desire to conduct the affairs of the Department in the most economical manner, and in such a way as to bring about the best results in the various branches of the Department.

The following is a statement of the cash receipts and disbursements of the office for the fiscal year ending November 30th, 1904.

APPROPRIATIONS.

DEPARTMENT OF PUBLIC WORKS	Appropriated.	Expended.
Miscellaneous street work.....	\$12,000.00	\$12,470.80
Repairing paved streets	2,500.00	2,550.96
Cleaning streets.....	17,000.00	15,892.50
Bridges and culverts	200.00	101.93
Gutters and drains	1,500.00	1,009.35
Crossings.....	1,500.00	2,373.94
Cleaning crossings	500.00	157.40
Sidewalks	2,000.00	946.65
Curbing	5,000.00	5,879.25
Opening streets.....	500.00	300.00
Lower free bridge.....	7,200.00	8,807.78
Upper free bridge.....	2,800.00	2,800.00
Boundary roads	4,000.00	4,000.00
Repairing and cleaning sewers	5,000.00	7,765.49
Commissioner of Public Works	2,900.00	2,900.00
Superintendent of Special Assessments	1,000.00	1,000.00
Superintendent of Sewers	1,200.00	1,200.00
Superintendent of Streets.....	1,200.00	1,200.00
Engineer, assistants, etc.....	8,970.00	9,832.41
Miscellaneous expenses, tools, etc.....	850.00	1,207.75
Farm Creek bridge	2,500.00	2,964.13
City scales	300.00	327.90
Harbor Master's salary.....	100.00	100.00
Public wells and fountains.....	500.00	1,243.22
Public squares.....	2,000.00	2,343.46
North Peoria hall	100.00	146.90
South Peoria hall	100.00	100.16
Residence, House of Correction	50.00	7.25
Street signs.....	200.00	69.75
Pier protection upper free bridge	2,600.00	772.85
Asphalt repair plant.....	1,800.00
Improvement public levee	5,000.00	7.00
Total.....	93,070.00	\$90,478.83
Superintendent of building	1,500.00	
Printing building laws	150.00	
Total.....	1,650.00	

**Extraordinary Occurrences During the Year Requiring the
Especial Attention of this Department.**

Lower Free Bridge.

On April 4th, 1904, at about 11 o'clock P. M., two spans of the easterly end of the wagon bridge spanning the Illinois River at the foot of Bridge Street, collapsed and fell

into the river, owing to the giving way of the remaining portion of a pier damaged recently prior by the high stage of the water, thus causing a suspension of traffic for a considerable length of time; during which time the City Council investigated the propriety of establishing and operating a ferry until proper repairs could be made to the bridge. Immediately upon abandoning the ferry proposition, it was decided to drive piling, extending the trestle work at the easterly approach to the remaining span immediately east of the draw span. After experiencing much difficulty in procuring piling of the dimensions required, and on account of the inability of the railroads (for the want of bridges along their roadway) to deliver the same, the work of constructing such trestle work was entered upon and pushed to completion. The construction being similar to the old trestle on the extreme easterly end of the spans so collapsed. The length of the spans taken out by the flood being one hundred forty-six (146) feet and one hundred forty-five (145) feet and three (3) inches each; also eight (8) feet of the remaining span was broken as well as forty-one (41) feet of trestle, making a total of new construction of three hundred forty (340) feet at a cost of \$3,868.19. Traffic being resumed May 14th, 1904.

The remaining portion of the old bridge was repaired, applying several new truss timbers; also re-inforcing or splicing nearly all those allowed to remain, and applying new floor joists and new deck or floor covering, costing \$1,061.00.

Upper Free Bridge.

In compliance with the order from the War Department, piling were driven at the bridge known as the Upper Free Bridge, consisting of clumps for pier protection; said clumps being drawn together at the heads and hooped with wire cable, at a cost of \$918.75.

Farm Creek Bridge.

Following is the character of work done at the bridge across Farm Creek.

Paving approaches and constructing protection wings costing \$206.60.

Krause Avenue Sewer.

A sewer was constructed on Krause Avenue from Adams Street to Livingston Street by order of the City Council by special appropriation. The improvement consisted of the following:

272 feet 24-inch vitrified pipe.....	\$213.00
54 feet 10-inch vitrified pipe.....	10.80
Labor.....	156.05
Bricklayers and helpers	55.75
Castings, 1 Columbus catch basin.....	12.00
Castings, 2 manholes	17.00
Brick	11.00
	<hr/>
	\$475.60

Cattle Burning at Corning Distillery.

On account of an explosion and the collapse of a warehouse at the Corning distillery on June 4th, 1904, fire was communicated at the cattle sheds, burning the buildings to the ground, and killing about three thousand (3,000) head of cattle, causing great apprehension for the health of the citizens of the City of Peoria. It was decided by the Mayor and Aldermen that, owing to the immediate proximity of said barns to the city, effort must be made, without delay, to remove and dispose of the carcasses, and this department was directed to proceed with the work, which was accordingly carried into execution, commencing on the morning

of June 6th. The process of burying was at first employed and proved to be a failure, whereupon the process of burning was resorted to, with perfect success, by using carbolic oil for purification and preserving, as well as for combustion, jointly with coal oil, and several hundred loads of old wood. By this process the carcasses were totally consumed and the premises cleared for new buildings.

The following is an itemized statement of the cost of disposing of the cattle at the Corning distillery, which statement includes all the cost.

Expended in Labor.....	\$1966.50
A. A. Bushel & Son, 49 barrels coal tar at \$4.75...	\$ 232.75
36980 gallons carbolic oil at 7½c, 2773.50 making a total of.....	3006.25
Standard Oil Co.,—1840 gallons oil at 8½c.....	165.60
Royal Oil Co.,—9840 gallons Oil at 8½c.....	836.41

Repairing Paved Streets.

All asphalt streets have been repaired, except such streets as were found, upon careful inspection, to be disintegrated to such an extent that repairs were impracticable. The asphalt streets in this city have been sadly in need of repairs long before the time that repairs were actually made, because of the fact that the city has no way of making repairs, for the want of apparatus or plant for repairing asphalt streets.

I would recommend that an ample appropriation be made for apparatus, plant and regular crew, so that asphalt streets can be repaired, from time to time, when necessary, instead of allowing holes, cuts, cracks and other imperfections unrepaired for months, to the detriment of the pavement and the inconvenience of the public.

Cleaning Paved Streets.

This Department made a special effort to keep the paved streets in the best possible condition, endeavoring to protect the health and comfort of our citizens.

I would recommend that a liberal appropriation be made for the purpose of purchasing sprinklers and sweepers, which would enable the Department to clean the streets more rapidly and better, as well as cleaning several times the amount of territory now cleaned by hand, therefore giving the city the benefit of cleaner streets, and greater in extent. Flushing or washing the streets cannot be employed because of the fact that a large majority of the improved streets are paved with brick, and nearly, without exception, the interstices are filled with sand, which, by the use of water, is washed out, and the upper or wearing surface is without protection, causing the brick to shell, scalp and break readily, thus causing the streets to become rough and the pavement to wear out much sooner than they otherwise would.

Curbing Set During the Year 1904.

The following is a statement of the curbing set on various streets and avenues within the city limits during the past year. The total amount of curb set was 22,451.3 lineal feet, of which 12,005.4 lineal feet was new curb and 10,445.9 lineal feet was old curb taken from streets which were improved and on which new curb was substituted.

Parks, Squares and Boulevards.

Our small parks and squares have received very careful attention by the several custodians, and were kept in excellent condition. The boulevards as well were given special attention by the attendants; the flower beds and lawns presenting a beautiful appearance.

Conclusion.

In conclusion, I desire to express my thanks to His Honor, the Mayor, and Members of the City Council, the City Engineer, Superintendent of Streets, Superintendent of Sewers, Sidewalk Inspector, and all other employes for the hearty co-operation I have received at their hands.

Respectfully submitted,

R. W. SCHUCH,
Commissioner of Public Works.

REPORT OF THE SUPERINTENDENT OF STREETS

PEORIA, ILL., January 2, 1904.

R. W. Schuch, Commissioner of Public Works.

DEAR SIR:—I have the honor to submit herewith the annual report of work done by this department for the fiscal year ending December 31st, 1904.

Paved Streets.

During the past year there were cleaned 865½ miles of brick paved streets; 2,749½ miles of asphalt streets and 3 miles of novaculite streets; a total of 3,618 miles.

All street cleaning was done by hand. All paved streets in the business center of the city were cleaned daily; those in the residence portion weekly.

Alleys.

During the year 1904, there were 463 blocks of brick paved alleys cleaned by hand brooms and scrapers and 58

blocks of cobble-stone paved alleys, removing therefrom 4,689 square yards of garbage and dirt.

48 blocks of unpaved alleys have been graded so that all water could run uninterruptedly.

Miscellaneous Work Done.

During the past year the easterly roadway and approach to the upper free bridge, one mile in length, was graded and opened up for traffic.

The approaches to the Farm Creek bridge were filled with suitable material. 500 loads of rock and dirt were placed on the river side of the Detention hospital, at the foot of Grant street. This was made necessary by the high water washing away the foundation.

In conclusion I would say all the work has had my personal attention and supervision and was done with as small an expense as possible, and I would suggest that the appropriations for street cleaning and miscellaneous street work be larger. Also that a small increase be made in the appropriation for crossings. That all crossings hereafter be constructed of brick, the expense of a brick crossing being only one third larger than that of wood and the life of a wood crossing is only two years, while the life of a brick crossing is at least ten years.

I would also suggest that an appropriation be made for flushing the streets in the business district once each week, the cost of which would not exceed \$1,500.00 for labor. Also that some arrangements be made, either by an ordinance or an appropriation, for the sprinkling of our brick paved streets. This would lay the small particles of dust and prevent the same from being carried into the stores and residences, thus making the sanitary condition of the city much better. This could be done at a small expense.

Respectfully submitted,

GEO. E. WILDE,
Superintendent of Streets.

REPORT OF THE SUPERINTENDENT OF SEWERS.

Mr. R. W. Schuch, Commissioner of Public Works.

DEAR SIR : I have the honor to submit for your consideration the report of the operations of the Sewer Department for the year ending December 31st, 1904. The following catch basins were placed and charged to the various special assessments:

- One new Columbus, southeast corner Oak and Washington.
- One new Columbus, northwest corner Oak and Washington.
- One McDonald, reset, corner Oak and Washington.
- One McDonald, reset, northwest corner Maple and Washington.
- One McDonald, reset, northwest corner Persimmon and Washington.
- One McDonald, reset, northeast corner Persimmon and Washington.
- One new Columbus, southwest corner New York and Pennsylvania.
- One new Columbus, southeast corner New York and Pennsylvania.
- One new Columbus, northwest corner New York and Pennsylvania.
- One new Columbus, northeast corner New York and Pennsylvania.
- One new Columbus, northwest corner Armstrong and Jackson.
- One new Columbus, southwest corner Armstrong and Jackson.
- One new Columbus, northeast corner Armstrong and Jackson.
- One new Columbus, north side, between Jackson and White, on Armstrong.
- One new Columbus, south side, between Jackson and White, on Armstrong.
- One new Columbus, northwest corner Armstrong and White.
- One new Columbus, southwest corner Armstrong and White.
- One new Columbus, northeast corner Armstrong and White.
- One new Columbus, northwest corner Armstrong and California.
- One new Columbus, northeast corner Armstrong and California.
- One new Columbus, south side California and Armstrong.
- One new Columbus, northwest corner New York and Armstrong.
- One new Columbus, northeast corner New York and Armstrong.
- One new Columbus, south side New York and Armstrong.
- One new Columbus, Depot and Oak.
- One new Columbus on Oak, between Warner and Reed, east side.
- One new Columbus on Oak, between Warner and Reed, west side.
- One McDonald, reset, northeast corner Oak and Washington.

One McDonald, reset, on east side of Oak, between Washington and Adams.

One McDonald, reset, on west side of Oak, between Washington and Adams.

One new Columbus, northeast corner Fisher and Prairie.

One new Columbus, northwest corner Fisher and Prairie.

One new Columbus, intersection of Prairie and Reed.

One new Columbus, southeast corner Oak and Reed.

One new Columbus, southwest corner Maple and Reed.

One McDonald, reset, southeast corner Maple and Reed.

One McDonald, reset, west corner Shipman and Reed.

One new McDonald, east corner Shipman and Reed.

One McDonald, reset, intersection Smith and Reed.

One McDonald, reset, intersection Oak and Reed.

One new Columbus, northeast corner Shipman and Smith.

One new Columbus, southwest corner Spencer and Smith.

One new Columbus, northeast corner Merriman and Smith.

One new Columbus, southwest corner Merriman and Smith.

One new Columbus, southwest corner McReynolds and Smith.

One new Columbus, northeast corner McReynolds and Smith.

One new Columbus, northeast corner Saratoga and Smith.

One new Columbus, southwest corner Webster and Smith.

One new Columbus, southeast corner Webster and Smith.

One new Columbus, northeast corner Steubenville and Smith.

One McDonald, reset, southeast corner Steubenville and Smith.

One McDonald, reset, northeast corner Webster and Smith.

One McDonald, reset, southwest corner Saratoga and Smith.

One McDonald, reset, northwest corner Saratoga and Smith.

One McDonald, reset, northwest corner Elliott and Smith.

One McDonald reset, Southwest corner Elliott and Smith.

One McDonald reset, Northeast corner Elliott and Smith.

One McDonald reset, northwest corner McReynolds and Smith.

One McDonald reset, northwest corner Merriman and Smith.

One McDonald reset, northwest corner Spencer and Smith.

One McDonald reset, northeast corner Spencer and Smith.

One McDonald reset, northwest corner Shipman and Smith.

During my term of office, I made it my duty to find where catch basins were most needed. The only way to find out where these basins would do the most good was to go over the entire city and see where water lay in the streets after each rain. I have gone over the city every time it rained during the last year. I then went to the different Aldermen and asked them to have basins placed at the following locations:

One new McDonald inlet, northwest corner Middle and Webster.
One new Columbus, north side, Fourth and Kane.
One new Columbus, south side Garden, west of Tyng.
One new Columbus, Knoxville, north of Glen Oak,
One new Columbus, Caroline, south of Adams.
One new Columbus, northeast corner Main and Madison.
One new Columbus, northeast corner Fifth and Elliott,
One new Columbus, northeast corner Fifth and Elliott.
One new Columbus, northwest corner Fifth and Elliott.
One new Columbus, northeast corner Monroe and Main,
One new Columbus, southeast corner Perry and Morton.
One new McDonald, northwest corner Webster and Johnson.
One new McDonald, Shelley, north of Lincoln.
One new Columbus, Washington, west of Cedar.
One new Columbus, east side of Goodwin, north of Seventh.
One new Columbus, west side of Goodwin, north of Seventh.
One new Columbus, corner Franklin and Adams.
One new Columbus, corner Bridge and Adams.

New Manholes.

Intersection of Elliott and Third.
Intersection of Kane and Third.

Flush Tank and Manholes raised to surface.

One on Wayne and Madison.
One on Voris, between Adams and Jefferson.
One on Sanford and Third.
One on Sanford between Third and Fourth.
One on Maple, north of Warner.
One on Elm, north of Warner.
One on Persimmon, north of Warner.
One on Seventh and Western.
One on Second, west of Webster.
One on Saratoga, between First and Second.
One on Saratoga, between Fifth and Seventh.
One on Elliott, between Fifth and Sixth.
One on Alley, between Callender, north of Moss.
One on Alley, south of Barker and north of Moss.
One on Alley between Barker and Fredonia, off University.
One on Alley north of Moss, east of Saratoga.
One on Perry and Spring.
One on Saratoga and Third.
One on Pope and Kettelle.
One on Alley between Butler and Kettelle, off Steubenville.
One on Adams and South.

One on Tyng and Garden.
 One on Garden and Louisa.
 One on Center and Helen.

Manholes and Flush Tanks lowered on account of Grading Streets.

Seventh and Elliott.
 Hillyer and Shipman.
 Third, west of Webster.
 Third and Fisher.
 Fifth and Shipman.
 Shipman, between Fourth and Fifth.

Manhole Covers Replaced.

Adams and Wayne,
 Jefferson and Hancock.
 Alley, north of Reed.
 Sanford, between Third and Fourth.
 Water and Walnut.
 Jefferson and Wayne.
 Dechman and Illinois.
 Spencer, between Fifth and Sixth.
 South and Washington.

Catch Basins Cleaned.

Having paid considerable attention to this part of the work, I have gone over the entire city three times and when the cold weather set in, every catch basin was cleaned to the bottom.

Sewer District No. 1.

This case was tried in Court and did not pass. I was in hopes this sewer would go through this season as it is badly needed.

North Peoria Sewer, East Section.

The east section of the North Peoria sewer is now under construction. The contract was let by the Board late in the fall and the contractors have been working every day that the weather would permit.

South Street Sewer.

Steps have been taken to build the South Street Sewer System. The city engineer has been instructed to prepare plans for the same and he is now working on them. This system will embrace territory south of Lincoln, between Cedar and Blaine to the Illinois river.

Sewer Permits.

There were issued during the year 354 permits for sewer connections as compared with 337 the previous year, showing a greater tendency to connect new buildings with the sewers at the time of erection.

Monson & Sanford's Addition.

Previous to this year there has been much trouble in Monson & Sanford's Addition, the overflow from the street filling the cellars in the vicinity of Swinnerton and Sanford streets. We have built a storm water sewer on Swinnerton street to Globe street, up Globe street to Sanford street. On this we have built eight basins which helps to take care of the overflow.

Inspections.

We have made several inspections of the different sewers and find them in need of various repairs. We ex-

In my last report I asked that steps be taken to put the Spring Street Sewer in good shape before the east section of the North Peoria Sewer was joined to it. Nothing has been done and they have attached this sewer and now repairs will be that much harder to make on account of the additional water.

My last report shows that the sewer was in bad condition at the outlet and is still in the same condition. This will soon have to be rebuilt.

The city now has over \$1,000,000 worth of sewers in the streets. Some of them are new and some are old and need repairs. I would ask that when the appropriation bill is prepared, that enough funds be appropriated to take proper care of the sewers. Looking over former reports, I find that the city has put in more catch basins in the past two years than has been put in in ten years; more sewers have been cleaned and catch basins have been gone over not only once a year but three and four times, as some of them are at sandy hills and when it rains, the sand runs into the basins. These places we go to after each rain. As there are several hundred more catch basins to be added and looked after, I would say that it will require more funds to take proper care of the sewers.

Respectfully submitted,

S. W. ECKLEY,
Superintendent of Sewers.

REPORT OF SIDEWALK INSPECTOR.

R. W. Schuch, Commissioner of Public Works.

DEAR SIR:—I herewith submit for your consideration a report of the sidewalks constructed under my supervision during the year ending December 31st, 1904, as shown by the following tables:

Total number feet of Brick Walk..... 8,995

Summary.

Brick 8,995 lin. ft.

Cement 18,558 lin. ft.

Total..... 27,553 "

Total miles..... 5.21

Increase over 1903... 8,214 lineal feet or 1.55 miles.

In addition to the new walks laid, a number of old brick walks have been taken up and relaid so as to conform to established grades. Quite a number of worn and low places in the old brick walks have been put in a proper state of repair. It will be noticed that the amount of cement walk laid, is more than double that of brick, which is in itself an evidence of the fact that cement walks are being better constructed and hence are becoming more popular with the property owners; and especially so in the residence portion of the city. While the laying of walks has been general throughout the city, I desire to call attention to the fact that in that portion of the city formerly known as North Peoria, a great

deal of the old plank walk (which served its purpose so well in its day) has been replaced by beautiful white cement walks.

I desire to thank the City Engineer and his assistants for the promptness with which grades have been given; and also to thank the many sidewalk contractors and property owners for their uniform courtesy to me during the past year.

Respectfully submitted,

B. C. NEWTON,

Sidewalk Inspector.

ANNUAL REPORT OF THE CITY ENGINEER.

OFFICE OF THE CITY ENGINEER, }
PEORIA, ILL., JANUARY 30, 1905. }

To the Honorable Mayor and Aldermen of the City of Peoria.

GENTLEMEN:—I have the honor to submit herewith for your consideration the report of the operations of the Engineer's Department for the year ending December 31, 1904.

Sidewalks.

The report of B. C. Newton, Inspector of Sidewalks, shows that, during the past year, there was constructed 8,995 lineal feet of brick sidewalk and 18,558 lineal feet of cement sidewalks, same being a total of 27,553 lineal feet, or 5.21 miles.

The Board of Local Improvements has instructed the Engineer's Department to submit estimates for the construction of numerous sidewalks throughout the city. The estimates have been prepared and, in a majority of cases, ordinances have been submitted to your honorable body, and the same have been approved. There has been no instance in which judgment has been taken in the County Court for the construction of the same, as is contemplated under the terms of a Local Improvement Act, adopted June 14th, 1897, and in force July 1st, 1897, and all acts amendatory thereto.

It is true that, in a majority of cases, property owners, upon notification, have constructed the work under private contract, as is their privilege to so do; but, in a number of instances, the portions constructed have been widely separated and little, if any, benefit has resulted from the passage of the ordinance.

In a number of instances, where ordinances have been passed requiring the property owner to construct the walk to the permanent grade, it will be necessary for the Department of Public Works to grade the roadway of the street, so as to prevent the sidewalk itself from becoming a gutter.

Curbing Set During the Year 1904.

The following is a statement of the curbing set on various streets and avenues within the city limits during the past year. The total amount of curb set was 22,451.3 lineal feet, of which 12,005.4 lineal feet was new curb and 10,445.9 lineal feet was old curb taken from streets which were improved and on which new curb was substituted.

Sewers.

After a number of years of delay, the contract for the construction of the North Peoria Sewer, East Section, was executed, the contractors being Messrs. Harding & Nelson, of Racine, Wisconsin.

Owing to the length of time intervening between the preparation of the estimate and the execution of the contract, and also owing to the fact that the assessment on various tracts of land, as returned by the Superintendent of Special Assessments, was reduced by order of the County Court and no provision was made for the insertion of this reduction in the original total, it was impossible to secure a price within the estimate of the Engineer, and this will necessitate a supplementary assessment being levied for the excess of cost above the assessment as confirmed by the Court.

This improvement consists of 7,460 lineal feet of brick sewers, ranging in size from 48-inch circular to 22x33-inch egg-shaped sewer, and 31,500 feet of pipe sewer, ranging in size from 24-inch to 8-inch. The bid prices for the construction were as follows:

6,897 lineal feet 8-inch pipe sewer at	\$.65 per lineal foot
7,370 lineal feet 12-inch pipe sewer at90 per lineal foot
7,580 lineal feet 15-inch pipe sewer at	1.15 per lineal foot
3,045 lineal feet 18-inch pipe sewer at	1.40 per lineal foot
2,640 lineal feet 20-inch pipe sewer at	2.00 per lineal foot
4,010 lineal feet 24-inch pipe sewer at	2.90 per lineal foot
700 lineal feet 22x33-inch brick sewer at.....	2.30 per lineal foot
395 lineal feet 24x36-inch brick sewer at.....	2.75 per lineal foot
370 lineal feet 26x39-inch brick sewer at.....	3.20 per lineal foot

1,105 lineal feet 28x42-inch brick sewer at.....	\$ 8.25 per lineal foot
890 lineal feet 30x45-inch brick sewer at.....	4.10 per lineal foot
765 lineal feet 32x48-inch brick sewer at.....	4.60 per lineal foot
705 lineal feet 34x51-inch brick sewer at.....	5.25 per lineal foot
720 lineal feet 36x54-inch brick sewer at.....	5.00 per lineal foot
1,810 lineal feet 40-inch brick sewer at.....	5.35 per lineal foot
23 manholes, over brick sewers, complete, each..	34.00
76 manholes, over pipe sewers, complete, each..	34.00
20 flush manholes, complete, each.....	45.00
231 catch basins and connections, complete, each.	48.00

The present storm water sewer on Spring street serves as an outlet for this section. Considerable work has already been performed upon the contract, and the entire construction should be completed by the first of August, 1905—the contract price for said sewer being \$87,969.

The Board of Local Improvements has requested the Engineer's Department to prepare plans for what will be known as the South Street Sewer System, the Sanger Street System, and Sewer District No. 1, which plans are now under way.

In the construction of Sewer District No. 1, there is considerable territory in what is now the Village of Averyville, which should be included within this system, the natural outlet of which is a creek, which now extends along Grant Street. The outlet for this sewer would be a very expensive one, and, in my judgment, the construction of the sewer should be delayed somewhat until the whole territory could be sewered. The bridge or culvert which now exists at Adams Street is in a bad condition, and a new one should be substituted which will form a part of the general outlet for this sewer system.

In order to take care of the condition which formerly existed in the neighborhood of Swinnerton, State and Globe Streets, an extension was constructed from the old Goose Lake Sewer, which terminated at the west property line of State and Swinnerton Streets, down State Street to Globe Street, thence northeasterly on Globe Street to Sanford Street. This sewer was completed out of the general appropriation by Charles W. O'Neill, of this city, at a total

cost of \$1,255.94. Eight catch basins were constructed on this improvement, and no trouble has resulted since the completion of the same.

A 20-inch pipe sewer was extended north on Goodwin Street to the alley to drain a low spot, which has formerly given considerable trouble. This pipe connects at Seventh Avenue with the old Goose Lake sewer.

The 24-inch pipe sewer which terminated at Krause Avenue was extended one block west to Livingston Street. This work was done under the direction of the Commissioner of Public Works. At this point a private sewer was constructed by the Home of the Good Shepherd, north on Livingston Street to Starr Street, thence east on Starr Street to the premises of the Home.

Pavements.

Table No, 1, accompanying this report, gives a detailed statement of the amount, location and character of the pavements constructed during the past year, of which the following is a summary:

	Square Yards	Miles	Miles 30 feet wide
Special assessment	46,423	2.49	2.64
Private contract	924	0.06	0.05
Central Railway Co	1,508	0.09	0.09

The matter of the improvement of Chambers avenue, between North Street and Flora Avenue, is still before the County Court. In all probability the street will not be narrowed and the improvement be made as originally contemplated.

The total number of square yards of pavement of the various classes is shown in the table below:

CLASS OF PAVEMENT	Total Square Yards	Length in Miles	Length in Miles 30 feet wide
Brick	672,842	32.78	38.23
Asphalt	249,883	12.61	14.20
Novaculite	17,264	0.97	0.98
Cobblestone	11,772	0.60	0.67
Stone Block	10,896	0.54	0.62
Total	962,657	47.50	54.70

The following table shows the amount, character and year of pavements laid upon the streets and alleys, not including that laid in the right-of-way of the street railway company.

Year	Brick		Asphalt		Novaculite		Cobble Stone		Stone Block		Total Square Yards	Length	
	Square Yards	Length	Square Yards	Length	Square Yards	Length	Square Yards	Length	Square Yards	Length		Miles	Miles 30 feet wide

Asphalt Pavements.

The total number of yards of asphalt in the City of Peoria at the present time is 249,883. This represents an expenditure of \$700,000. An asphalt pavement is a very desirable one; but, at the same time, is an expensive one, both as to first cost and the cost of maintenance. The present condition of the asphalt pavements which have been constructed in this city is not one which the city can be proud of.

This condition may have been the result of two causes: First—The probability of the use of poor material in the construction. Second—The lack of proper attention and repairs. As regards the first element, will state that the City of Peoria has no apparatus by which the materials may be analyzed and the quality thereof ascertained. The reports of this department of previous years have called the attention of your Honorable Body to this condition of affairs, but nothing has ever been done to remedy the same.

An asphalt pavement is one which should be given constant attention and frequent examination. The slightest defect or imperfection should be remedied at once, and this can only be done by the city having a repair plant of sufficient size and equipment to do this work and not being compelled to rely upon some outside company to make these repairs at such time as they may have a contract for the construction of an asphalt pavement in this city. We require now a guarantee of ten years from the company constructing the improvement, which adds considerable to the first cost.

If this department possessed the necessary apparatus for the testing and determination of the quality of the material used, the question of guarantee could be eliminated, as is done in the case of our brick paving, and the property owners would secure a more satisfactory and better improvement at a considerable less cost.

There are a number of cities throughout the country which have, in the past few years, established a laboratory for the testing of their asphalt material, in connection with their Engineering Department, and also purchased the necessary material and apparatus for a repair plant to be used in connection with the Department of Public Works. The cost and extent of the equipment necessary for this work can be judged by a comparison with the condition existing in the cities referred to above.

It has been the custom of the City of Peoria, with one or two exceptions, to use, as a filler, common sand in the construction of their brick pavements. This is cheap, but affords no protection to the edges of the brick, and, in the course of a few years, the pavement becomes rough and noisy. The method used a few years ago in cleaning streets—that is to say, the suction sweeper, although a very good one—was extremely detrimental to the brick surface, inasmuch as the suction not only cleaned the surface of the brick but drew from the interstices the sand filler, thereby leaving the edges exposed and unprotected.

The experiment of cleaning the streets by flushing the same with a hose was tried the past summer. That portion of the pavement which was used for the experiment is a very rough one—large brick being used, with a sand filler. The same serious objections present themselves to this method as is stated above—the action of the water removing the sand between the brick and leaving the same unprotected.

The principal complaint of a property owner on residence streets, against the use of brick, is on account of the noise. This can be reduced considerable and practically eliminated by the use of some plastic filler, such as refined asphalt. The use of this material allows the surface to be opened for such repairs or connections as may be needed, from time to time, and permits the use of the brick in repair.

Another filler, which is commonly used, is that of the Portland cement grout. This makes a smooth, hard sur-

face, and is an excellent one, provided no disturbing of the surface will ever take place.

An examination of the brick paving on Hamilton Street, from Randolph Avenue to Glen Oak Avenue, and on Main Street, from North Street to Glen Oak Avenue, will show the benefits which are derived by the use of filler which protects and supports the brick. Inasmuch as these two pavements were laid at the same time, the condition of Hamilton Street is much better than that of Main Street. While this may not be a fair comparison, owing to the fact that the traffic on Main Street is much more severe than that on Hamilton Street, nevertheless an examination of the brick shows no spalling of the edges, and the surface of the brick of the latter street is as smooth as the day it was laid.

When an opening must be made for a connection of any kind, providing the grout filler has been well applied, it will be necessary to break the brick, thereby destroying the value of the old material, and requiring the substitution of new material for the repair.

If a plastic filler be used, experience has shown that an opening may be made, the filler removed from the sides of the brick, remelted and used again for the proper repair without any loss.

It has been the policy of some of the Board of Local Improvements during the past year to seemingly experiment with the various forms of construction. I trust that the results obtained will be satisfactory and not work any hardship on any property owner who has paid for his improvement.

As stated in the report of the year previous similar conditions do not exist throughout the city and it would not be wise to attempt a cheap form of construction in every locality.

It has been the policy of the Board of Local Improvements to call upon the Engineer's Department for numerous estimates for improvements which, at the public hearing, are shown to be uncalled for and not desired by the property

owners. It takes up the same amount of time of the Engineer's Department to secure the preliminary data as it would for the letting of a contract for the same improvement.

During the past year a few improvements contemplated by the Board have failed of confirmation in the county court, due to technicalities of various kinds, among which it has been said that the defect existed in the estimate of the Engineer. Inasmuch as the Engineer is not the legal authority of the Board and must secure his interpretation of the improvement act from the proper authorities, it is not proper that this criticism be made a personal one. A review of the decisions of the Supreme Court with reference to the estimate of the Engineer in improvement ordinances will show considerable variance and the latest one quoted will plainly show that the estimate of the Engineer as it has been prepared in the past has been substantially correct in all cases.

River Records.

The following is taken from the records of the gauge reading at the lower free bridge and shows the high and low water marks since 1895:

YEAR	HIGH WATER		LOW WATER	
	Date	Gauge	Date	Gauge
1895..	December 29	14.9	June 21 to 25.....	3.1
1896..	January 1	14.3	June 16 to 19	3.6
1897..	March 24 to 28.....	18.3	Sept. 29 to Oct. 15	3.7
1898..	March 31	19.3	July 24	3.5
1899..	March 22	15.1	Aug. 22-24 and 27-29	3.4
1900..	March 16 and 17.....	19.9	January 9	4.9
			September 25	5.3
1901..	March 31	17.7	July 26 to 28.....	5.5
1902..	July 22	21.0	January 22 to 27	6.8
1903..	March 12 and 13.....	19.3	August 25	8.4
1904..	March 28	23.15	September 16 to 17.....	7.1

The high water of March 28th, 1904, is the highest point reached in the last 50 years, the same being 1.25 feet above that of May 1892.

All the readings are referred to the zero of the gauge, the same being at an elevation of 22.55 above the datum plane which is used as a base for all levels throughout the city. This datum plane referred to the levels for the survey of the Illinois and Desplaines River, is at an elevation of 413.360. The Memphis datum plane being used as a base for the levels of the above survey. High water, March 28th, gauge reading 23.15 or 45.7 city datum. Low water, September 16 and 17, gauge reading 71.10 or 29.65 city datum.

The following table shows the daily readings of the gauge at the Lower Free Bridge for the year 1904.

Day of Month	GAUGE READING											
	Jan.	Feb.	March	April	May	June	July	August	Sept.	Oct.	Nov	Dec.

Testing Laboratory.

Table No. 2 gives the results of the testing of paving brick submitted for use in the various improvements during the past year.

Table No. 3 gives the reports of the testing of Natural and Portland cements from samples collected from materials used throughout the city in municipal work.

Field Work.

The following amount of field work was performed during the past year:

Cross sections for pavements	4.36	miles
Transit lines for pavements	9.07	"
Grades given on paved streets.....	6.38	"
Grades given on unpaved streets	9.08	"
Transit lines on unpaved streets.....	15.40	"
Cross sections for sidewalks,.....	7.58	"
Grades given for sidewalks	8.50	"
Transit lines for sewers.....	1.70	"
Grades for sewers.....	1.21	"
Check levels.....	13.47	"
Cross sections for establishing grades.....	13.52	"
Total.....	90.27	"

Conclusion.

I desire again to call the attention of your Honorable Body to the needs of this office for a desirable blue-printing apparatus. As it is now, we must rely on sunlight to do this work, which causes considerable delay at times. If need be, the revenue derived from the use of a proper machine during the year, for commercial printing, would possibly equal the expenditure. With this one respect, the mechanical equipment of the office is all that can be desired.

Better results in the operation of this department could be secured if the large main office could be partitioned off, so as to provide a computing room. This, I think, could be done at a small expense.

It has been the custom in the past for the Engineer's Department to have a set of books for the Department of Public Works; but, inasmuch as this set is necessarily a duplicate of that required by the Comptroller, would suggest that, in the future, the services of a book-keeper be changed to that of an engineer and draughtsman for this work. The extent of work, which is yearly increasing, makes it absolutely necessary that an additional office man be secured, one who may, when called upon, be placed in charge of an additional field party, which is needed during the summer months. The work contemplated during the present year will make this a necessity.

The amount of office work, that is, in the way of records, is constantly increasing and for the benefit of the public, it should be brought to date as soon as possible. This can be accomplished by the extra man as mentioned above.

The expense of the operations of this department as shown by the Comptroller's Department are:

Pay roll	\$8,516.90
Miscellaneous expenses	1,315.51
Total	<u>\$9,832.41</u>

If more care were taken in the proper placing of the items of miscellaneous expenses, the expense account charged against this department would have been considerable less.

I desire to thank his Honor, the Mayor, and Aldermen and various committees with whom this department has been brought in contact with for the courteous treatment received; my colleagues of the Board of Local Improvements for the consideration and suggestions which have from time to time been received from them for the solution of the many problems which naturally arise in connection with municipal affairs and the members of the office force for the interest which they have taken in the performance of the duties connected with this department.

Yours respectfully,

H. E. BEASLEY,
City Engineer.
